

NEWTON'S 2nd LAW

- forces not balanced
- net force
- acceleration/deceleration

due to unbalanced forces, the net force causes the body to have an acceleration (accelerating/decelerating)

$$F = ma$$

(1) net force in the direction of motion → body accelerates

- thrust > resistive force
- car accelerates (velocity increases)

- weight > air resistance
- ball accelerates downwards

- thrust > weight + air resistance
- rocket accelerates upwards

(2) net force in the direction opposite to motion → body decelerates

- both forces opp to motion
- car decelerates, velocity decreases

- water drag > thrust
- ship decelerates

- friction > pulling force
- box decelerates

(3) body moving in circle / arc / bend at constant speed

- as car moves around at constant speed
- direction changes
- velocity changes → there is acceleration
