Taking Learning To Task Creative Strategies For Teaching Adults:

Taking Learning to Task Jane Vella, 2000-07-25 Reading this wonderful book is like having Jane Vella at your side. She gives us the courage to risk changing our established habits of teaching. Clifford Baden, director of programs for professional education, Harvard University. By marrying theory and practice, Vella has shown how to design learning that takes hold of the learner's mind, heart, and muscles. Jack McCall, professor, Principals Executive Program, University of North Carolina, Chapel Hill. You'll feel as though you've found the keys to creating profound and powerfully effective learning experiences. Anyone responsible for engaging a group of adults in learning will find this book invaluable. Rod Brooks, vice president for administration, EXPLORIS. Known for her work in popular education and her worldwide teaching experience, Jane Vella has significantly changed the way we view adult learning. In her three bestselling books, *Learning to Listen*, *Learning to Teach*, *Training Through Dialogue*, and *How Do They Know They Know*, she writes with one basic assumption: that learning is most effective when teachers involve their students in the learning process. In *Taking Learning to Task*, Vella shifts the spotlight from teaching tasks to learning tasks. Unlike traditional teaching methods, learning tasks are open questions leading to open dialogue between teacher and learner. To illustrate this unique approach, Vella provides seven steps to planning learning-centered courses, four types of learning tasks, a checklist of principles and practices, critical questions for instructional design, key components for evaluation, and other tools. She also shares real-world examples of successful learning programs, including online and distance learning courses. *Taking Learning to Task* is a hands-on, practical guide to designing effective learning tasks for diverse learners and diverse content. Teachers, trainers, and all types of instructors will find a wealth of advice for refining their day-to-day practice. *The Handbook of Training Technologies* William J. Rothwell, Marilyn N. Butler, Daryl L. Hunt, Jessica Li, Cecilia Maldonado, Karen Peters, 2010-04-15 This important resource offers an understanding of the basic principles that underlie training methods and the use of technology training in the workplace. The authors provide a primer for the four pervading and more advanced technologies used in business training: the Internet, computer-based training, knowledge management systems, and decision support tools. Appropriate for those who have little or no formal training in educational technology, this book addresses such topics as the decision to use, the pros and cons for using, and presentation strategies for media as varied as the Internet, teleconferencing, videoconferencing, satellite distance learning, and electronic performance support systems. Note: CD-ROM, DVD, and other supplementary materials are not included as part of the eBook file.

Heart-Deep Teaching Gary C.
