Viral Hit Cli Fi Novel:

The Noah Myth in Twenty-first-century Cli-fi Novels Helen E. Mundler, 2022 Breaks new ground by both analyzing the literary qualities of four recent rewritings of the Noah myth and contextualizing their concern with climate change within the wider crises of the Anthropocene. With the rise of concern about global warming in recent years, climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research. Flood narratives have become a subsection of cli fi in their own right. This book proposes new readings of four recent rewritings of the Noah myth: *Odds Against Tomorrow* by Nathaniel Rich, Margaret Atwood's *Maddaddam* trilogy, *When the Floods Came* by Clare Morrall, and *The Flood* by Maggie Gee. Helen E. Mundler's book takes into account the wealth of criticism that has appeared on these texts in recent years, acknowledging important contributions from critics including Adam Trexler, Adeline Johns Putra, and Astrid Bracke. However, her book's strength is that it takes a new approach, going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. While the importance of climate change is beyond debate, this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene. y of the texts and treating them not just as ideological statements but giving them their due as literary artifacts. Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare, science fiction authors have conjured apocalyptic scenarios of human extinction. Can such gloomy fates help us make sense of our contemporary crises? How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape? What other possible futures do narratives of the end of humanity allow us to imagine? Michael Bérubé explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of *Homo sapiens*. In a lively conversational style, he considers novels by writers including Ursula K. Le Guin, Margaret Atwood, Liu Cixin, Philip K. Dick, and Octavia Butler, as well as films that feature hostile artificial intelligence such as *2001: A Space Odyssey*, *Blade Runner*, and the *Terminator* and *Matrix* franchises. Bérubé argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human. Though framed by the possibility of human extinction, they are driven by a vision of the *ex-human*, a desire to imagine that another species is possible. For all science fiction readers

worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us

The Real Aftermath: How COVID-19 Changed the Way Science Fiction is Conceived, Read, and Interpreted Riccardo Retez, 2025-02-18 The Real Aftermath How COVID 19 Changed the Way Science Fiction is Conceived Read and Interpreted offers a profound exploration of how the COVID 19 pandemic has redefined the boundaries of speculative fiction Through contributions from scholars in literature media and cultural studies this volume examines the pandemic s deep impact on science fiction as a genre and cultural phenomenon The book navigates the thematic stylistic and ideological shifts that have emerged in response to the global health crisis revealing how science fiction has become a mirror of contemporary societal anxieties from isolation and contagion to resilience and dystopia Drawing from a rich array of media including literature film and video games The Real Aftermath delves into the portrayal of existential threats and explores how speculative narratives provide frameworks for imagining future crises and solutions By addressing both cultural and technological disruptions the book positions itself within the growing body of critical literature on the intersection between global crises and fiction offering original insights into the transformative power of science fiction in post pandemic society This volume is an essential resource for scholars and students in literature science fiction studies media and cultural analysis It can serve as a reference for academic research a methodological aid in classroom discussions and a guide for practitioners interested in the role of fiction in interpreting and responding to global crises

Understanding Public Debates Jens Martin Gurr, 2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today whether on different conceptions of liberty identity politics historical commemoration challenges of globalization or responses to climate change Understanding Public Debates presents case studies including Milton s Paradise Lost P B Shelley s 1820 Reform essay Philip Roth s The Human Stain the songwriting of Neil Young and Edward Young s 1720s Sea Odes recent climate fiction as well as non literary conflict narratives Rather than mining texts for arguments for or against certain positions this book is interested in how texts stage these debates by means of multiple perspectives narrative situations or ambiguities By suggesting how educators might use literary texts as conversation starters for more rational debates the volume also contributes to Public Literary Studies Three important fields are here brought together 1 the study of societal debates and conflicts and the ways in which they challenge pluralist societies 2 explorations of the societal functions of literature and of non literary narratives and 3 discussions of the role and functions of literary studies The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates

The Democracy of Suffering Todd Dufresne, 2019-09-12 In The Democracy of Suffering philosopher Todd Dufresne provides a strikingly original exploration of the past present and future of this epoch the Anthropocene demonstrating how the twin crises of reason and capital have dramatically remade the essential conditions for

life itself Images cartoons artworks and quotes pulled from literary and popular culture supplement this engaging and unorthodox look into where we stand amidst the ravages of climate change and capitalist economics With humour passion and erudition Dufresne diagnoses a frightening new reality and proposes a way forward arguing that our serial experiences of catastrophic climate change herald an intellectual and moral awakening one that lays the groundwork albeit at the last possible moment for a future beyond individualism hate and greed That future is unapologetically collective It begins with a shift in human consciousness with philosophy in its broadest sense and extends to a reengagement with our greatest ideals of economic social and political justice for all But this collective future Dufresne argues is either now or never Uncovering how we got into this mess and how if at all we get out of it The Democracy of Suffering is a flicker of light or perhaps a scream in the face of human extinction and the end of civilization

Water Lore Camille Roulière, Claudia Egerer, 2022-05-19 Located within the field of environmental humanities this volume engages with one of the most pressing contemporary environmental challenges of our time how can we shift our understanding and realign what water means to us Water is increasingly at the centre of scientific and public debates about climate change In these debates rising sea levels compete against desertification hurricanes and floods follow periods of prolonged drought As we continue to pollute canalise and desalinate waters the ambiguous nature of our relationship with these entities becomes visible From the paradisiac and pristine scenery of holiday postcards through to the devastated landscapes of post tsunami news reports images of waters surround us And while we continue to damage what most sustains us collective precarity grows Breaking down disciplinary boundaries with contributions from scholars in the visual arts history earth systems anthropology architecture literature and creative writing archaeology and music this edited collection creates space for less prominent perspectives with many authors coming from female Indigenous and LGBTQIA contexts Combining established and emerging voices and practice led research and critical scholarship the book explores water across its scientific symbolic material imaginary practical and aesthetic dimensions It examines and interrogates our cultural construction and representation of water and through original research and theory suggests ways in which we can reframe the dialogue to create a better relationship with water sources in diverse contexts and geographies This expansive book brings together key emerging scholarship on water persona and agency and would be an ideal supplementary text for discussions on the blue humanities climate change environmental anthropology and environmental history

Teaching the Literature of Climate Change Debra J. Rosenthal, 2024-04-26 Over the past several decades writers such as Margaret Atwood Paolo Bacigalupi Octavia E Butler and Kathy Jetn il Kijiner have explored climate change through literature reflecting current anxieties about humans impact on the planet Emphasizing the importance of interdisciplinarity this volume embraces literature as a means to cultivate students understanding of the ongoing climate crisis ethics in times of disaster and the intrinsic intersectionality of environmental issues Contributors discuss speculative climate futures the Anthropocene postcolonialism climate anxiety and the usefulness of storytelling in

engaging with catastrophe The essays offer approaches to teaching interdisciplinary and cross listed courses including strategies for team teaching across disciplines and for building connections between humanities majors and STEM majors The volume concludes with essays that explore ways to address grief and to contemplate a hopeful future in the face of apocalyptic predictions *Science, Technology and Magic in The Witcher* Kristine Larsen,2023-02-13 As Andrzej Sapkowski was fleshing out his character Geralt of Rivia for a writing contest he did not set out to write a science textbook or even a work of science fiction However the world that Sapkowski created in his series The Witcher resulted in a valuable reflection of real world developments in science and technology As the Witcher books have been published across decades the sorcery in the series acts as an extension of the modern science it grows alongside This book explores the fascinating entanglement of science and magic that lies at the heart of Sapkowski s novel series and its widely popular video game and television adaptations This is the first English language book length treatment of magic and science in the Witcher universe These are examined through the lenses of politics religion history and mythology Sapkowski s richly detailed universe investigates the sociology of science and ponders some of the most pressing modern technological issues such as genetic engineering climate change weapons of mass destruction sexism speciesism and environmentalism Chapters explore the unsettling realization that the greatest monsters are frequently human and their heinous acts often involve the unwitting hand of science

Problem-Based Microbiology E-Book Swapan K. Nath, Sanjay G. Revankar,2005-12-07 This concise problem based textbook covers 91 of the most common infectious diseases using case studies to promote interactive learning and to build a foundation of knowledge for clinical practice It presents an overview of how infectious diseases affect a particular organ system Then it provides clinical case scenarios differential diagnosis tables and succinct explanations of the infectious process with treatment options and outcomes Crisp full color images and USMLE style practice questions round out the text Presents a detailed clinical case study for each infectious disease covered including treatment and outcomes Integrates basic and clinical sciences Covers the most common infectious diseases including bioterrorism agents and emerging infectious diseases Promotes active learning by presenting the case study as an unknown and then providing differential diagnosis tables and rationales Features over 350 full color illustrations and images of clinical disease to reinforce written material Highlights key symptoms microbiology epidemiology and pathogenesis for rapid review Provides summary tables of important diseases caused by the infecting organism Includes practice questions to help prepare for the USMLE step 1 and 2 exams The Films of Bong Joon Ho Nam Lee,2020-09-29 Bong Joon Ho won the Oscar for Best Director for Parasite 2019 which also won Best Picture the first foreign film to do so and two other Academy Awards Parasite was the first Korean film to win the Palme d Or at Cannes These achievements mark a new career peak for the director who first achieved wide international acclaim with 2006 s monster movie The Host and whose forays into English language film with Snowpiercer 2013 and Okja 2017 brought him further recognition As this timely book reveals even as Bong Joon Ho has emerged as an

internationally known director his films still engage with distinctly Korean social and political contexts that may elude many Western viewers *The Films of Bong Joon Ho* demonstrates how he hybridizes Hollywood conventions with local realities in order to create a cinema that foregrounds the absurd cultural anomie Koreans have experienced in tandem with their rapid economic development Film critic and scholar Nam Lee explores how Bong subverts the structures of the genres he works within from the crime thriller to the sci fi film in order to be truthful to Korean realities that often deny the reassurances of the happy Hollywood ending With detailed readings of Bong's films from *Barking Dogs Never Bite* (2000) through *Parasite* (2019) the book will give readers a new appreciation of this world class cinematic talent
