The Ethnomethodology Program Douglas W. Maynard, John Heritage, 2022 It's been more than fifty years since Harold Garfinkel created the field of ethnomethodology a discipline that offers a new way of understanding how people make sense of their everyday world Since his book *Studies in Ethnomethodology* published in 1967 there has been a substantial although often subterranean growth in ethnomethodological EM work Studies in and appreciation of ethnomethodological work continue to grow but the breadth and penetration of his insights and inspiration for ongoing research have yet to secure their full measure of recognition This volume celebrates Harold Garfinkel's enormous contributions to sociology and conversation analysis exploring how ethnomethodology emerged the empirical consequences of Garfinkel's work and the significant contemporary work that has resulted from it Douglas W Maynard and John Heritage bring together experts from a wide range of theoretical and empirical areas to create the first comprehensive collection of work on EM that encompasses its role in studies of work in Conversation Analysis and in other subdisciplines Chapters highlight ethnomethodology's distinctive forms of ethnographic inquiry and its influences on a host of substantive domains including legal environments science and technology workplace and organizational inquiries survey research social problems and deviance and disability and atypical interaction The book explains how EM especially helped to set the agenda for gender studies while also developing insights for inquiries into racial and ethnic features of everyday life and experience Still there is much of what Garfinkel called unfinished business which means that ethnomethodological inquiries are continuing to intensify and develop Harold Garfinkel and Ethnomethodology addresses this unfinished business not only drawing attention to past accomplishments in the field but also suggesting how these accomplishments set the stage for future endeavors that will benefit from EM inspired approaches to social organization and interaction

The Book of Answers Tanya Stivers, 2022 Imagine for a moment the only way to confirm a yes/no question was by saying Yeah How different would this make our communication Relying on a large corpus of naturally occurring recordings of spontaneous social interaction this book explores all of the ways that we confirm questions in our everyday social lives Tanya Stivers analyzes what these different ways of responding allow us to do that is unique to each answer type When do we answer with Yeah rather than He is for instance or when do we use more complicated forms of confirming This information provides us with the basic response possibility space From that point we can examine what the range of responses in particular answers tells us about what is

important to us in managing social relationships through social interaction The book explains that we can conceptualize the response possibility space as having three dimensions alignment autonomy and affiliation Speakers rely on the details of their response to position themselves at a particular point in that three dimensional space sometimes accepting trade offs among the dimensions to achieve a stance that is higher in alignment and autonomy and lower in affiliation or higher in affiliation and autonomy but lower in alignment The Book of Answers uses real life conversations to find hidden patterns in how we do things together such as reach decisions tell stories or arrive at agreement or disagreement Delving into the science of how we talk this book investigates what those patterns tell us about human communication and our social lives

Accountability in Social Interaction Jeffrey D. Robinson, 2016 This volume brings together a collection of novel conversation analytic studies addressing the related concepts of account motive accounting and accountability with the goal of re exposing their multiple senses reiterating their interrelationships and in doing so breaking new conceptual ground and exposing pathways for future research

How Traditions Live and Die Olivier Morin, 2016 Of all the things we do and say most will never be repeated or reproduced Once in a while however an idea or a practice generates a chain of transmission that covers more distance through space and time than any individual person ever could What makes such transmission chains possible For two centuries the dominant view from psychology to anthropology was that humans owe their cultural prosperity to their powers of imitation In this view modern cultures exist because the people who carry them are gifted at remembering storing and reproducing information How Traditions Live and Die proposes an alternative to this standard view What makes traditions live is not a general purpose imitation capacity Cultural transmission is partial selective often unfaithful Some traditions live on in spite of this because they tap into widespread and basic cognitive preferences These attractive traditions spread not by being better retained or more accurately transferred but because they are transmitted over and over This theory is used to shed light on various puzzles of cultural change from the distribution of bird songs to the staying power of children s rhymes and to explain the special relation that links the human species to its cultures Morin combines recent work in cognitive anthropology with new advances in quantitative cultural history to map and predict the diffusion of traditions This book is both an introduction and an accessible alternative to contemporary theories of cultural evolution
