

The image is a title screen for the game "Dark Fantasy Saga". The title is centered at the top, rendered in a large, white, serif font with a metallic, slightly distressed texture. The word "DARK FANTASY" is on the top line, and "SAGA" is on the line below it. The text is framed by a decorative, symmetrical emblem that resembles a stylized, thorny branch or a gothic crest. The background is a dark, atmospheric scene of a stone dungeon. On the left, a stone archway leads to a brighter area where a wooden treasure chest sits on the floor. A torch is mounted on the wall nearby. On the right, a large, imposing figure of a knight in dark, ornate armor with gold accents is visible. The knight's helmet is a skull, and their face is a white, grinning mask. The overall lighting is dim, with warm light from the torch and the archway contrasting with the dark, shadowy surroundings.

The Economics of the Audiovisual Industry: Financing TV, Film and Web Mario La Torre,2016-12-23 This book is open access under a CC BY licence Recent reductions in public funding for audiovisual products have led to dramatic changes in the industry The lack of interaction between the industry and capital markets has made sourcing funds for audiovisual products especially difficult This book explains why the distance between the audiovisual and financial markets exists and considers the perspective of both audiovisual companies and financial intermediaries Providing a thorough

overview of the audiovisual industry in three major categories television cinema and web it analyses the financing behind each The author adapts the traditional assessment methods to include exploitation rights distribution deals and risk determinants he also proposes a pricing model for the audiovisual products demonstrating that prices and values in a industry of prototype goods do not depend solely on cost and revenue The book also includes a methodology for analysing the economics of the sector the different sales agreements between broadcasters and the distribution deals between distributors and independent producers Finally a description of the main financial products for private finance is provided as well as an explanation of how public funds can act as leverage to catalyze private resources through the use of guarantee funds In The Economics of the Audiovisual Industry the author suggests that rather than relying on subsidized public support the audiovisual industry should foster private public partnerships and market dynamics to promote an alternative funding model based on a profitable and long lasting connection between the audiovisual and financial markets The valuation model both for products and firms proposed in this book are at the basis of this new approach
