Biopunk Dystopias Lars Schmeink, 2016 Biopunk Dystopias analyses 21st-century cultural anxieties and dystopian visions about the consequences of biotechnology, especially genetic engineering, as part of contemporary social reality.

Dystopia Gregory Claeys, 2017 Dystopia: A Natural History is the first monograph devoted to the concept of dystopia. Taking the term to encompass both a literary tradition of satirical works, mostly on totalitarianism, as well as real despotisms and societies in a state of disastrous collapse, this volume redefines the central concepts and the chronology of the genre and offers a paradigm-shifting understanding of the subject. Part One assesses the theory and prehistory of

dystopia By contrast to utopia conceived as promoting an ideal of friendship defined as enhanced sociability dystopia is defined by estrangement fear and the proliferation of enemy categories A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms The work of Le Bon Freud and others is used to show how dystopian groups use such emotions Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity The prehistory of the process whereby enemies are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy Part Two surveys the major dystopian moments in twentieth century despotisms focussing in particular upon Nazi Germany Stalinism the Chinese Cultural Revolution and Cambodia under Pol Pot The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular Part Three examines literary dystopias It commences well before the usual starting point in the secondary literature in anti Jacobin writings of the 1790s Two chapters address the main twentieth century texts usually studied as representative of the genre Aldous Huxley's *Brave New World* and George Orwell's *Nineteen Eighty Four* The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present *The Great Romance*

Inhabitant, 2008-01-01 *The Great Romance* a two volume novella published under the pseudonym The Inhabitant was one of the outstanding late nineteenth century works of utopian science fiction Volume 1 was a possible model for Edward Bellamy's phenomenally successful *Looking Backward* while volume 2 was assumed lost for over a century until uncovered in the Hocken Library in Dunedin New Zealand Together these volumes represent a remarkable piece of science fiction writing as they proffer one of the first serious considerations of the colonization of other planets and the impact of human beings on an alien culture Here for the first time readers encounter descriptions of spacesuits and airlocks space shuttles and planetary rovers interplanetary colonization and cross species miscegenation Behind these genre defining elements is the story of John Hope who by means of a sleeping elixir awakes to a utopian community in a distant future a kingdom of thought where the struggle for existence has been eliminated and humanity operates under an unwritten law of civility and harmony aided by telekinesis that inerrantly reveals all wrong doers Since only two of the probably three volumes are extant the tale ends with a chilling cliffhanger In his introduction Dominic Alessio discusses the cutting edge aspects of this work and its significance in both the realm of science fiction and the history and culture of its day **Capitalism in Octavia Butler's "Parable of the Sower". Utopia through Immanent Critique**

Lena Danielmeyer, 2020-10-06 Seminar paper from the year 2020 in the subject English Language and Literature Studies Literature grade 1.0 University of Osnabrück language English abstract This paper will argue that in *Parable of the Sower* by Octavia Butler creates utopian hope by realistically building a dystopian vision which immanently criticises the present For reasons of brevity this will be elucidated mainly using the example of capitalism While an abundance of other issues taken up by the novel like climate change democracy racism or violence would

certainly serve as productive foci of analysis as well capitalism will be the centre of attention because it is at the core of the apocalyptic circumstances portrayed in the novel It also constitutes an intersection with most of the other issues named above making capitalism a suitable starting point Firstly a short overview will be given on contemporary interpretations of the state of utopia pointing out capitalism as a main factor in the changing of utopianism Among others Krishan Kumar s *The Ends of Utopia* Jerry Phillips s *Utopia and Catastrophe* in Octavia Butler s *Parable of the Sower* and Darko Suvin s *Metamorphoses of Science Fiction* will be consulted Realism cognition and estrangement will be pointed out as main tools of offering immanent critique and in extension utopian hope Secondly the production of immanent critique in *Parable of the Sower* will be analysed with the help of Mathias Nilges s paper on *The Realism of Speculation* Mike Davis s *City of Quartz* will serve to illustrate the realism in Butler s vision of future Los Angeles The second example will examine the company town Olivar Briefly consulting Rottinghaus Pluretti s and Sutko s discursive paper *The End of Material Scarcity* the effectiveness of this immanent critique will be discussed Lastly this paper will seek to show how immanent critique allows for the creation of utopian hope pointing towards the transformative value of utopian literature presented in Carl Freedman s *Critical Theory and Science Fiction* This paper will because of its limited length not be able to further investigate critiques of capitalism in any other context than that of Butler s novel Also it will not be analysing the portrayal of capitalism as essentially nostalgic and conservative making it the opposite of the utopian vision of adaptation and progress that it is contrasted with This paper will not delve deeper into other interesting aspects of the generation of utopian hope like narration

Hendrix, 2019-12-10 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject *Body Utopianism* Franziska Bork Petersen, 2022-07-04 This book investigates how desires to transform our bodies can bring utopia to the present and how utopian practices often lead to distinctly dystopian or anti utopian outcomes It is the first comprehensive study to address the paradoxical relationship between bodies and utopianism Franziska Bork Petersen discusses doping bodybuilding and cosmetic surgery alongside practices such as retouching the body as image on social media and looks at how fashion modelling and performance estrange the body Techniques and technologies to transform our bodies are increasingly accessible and suggest an excessive identification of the body as lacking To be a body in a culturally meaningful way we incessantly improve our bodily appearance and capacity The book therefore addresses the utopianism inherent in a cultural understanding of bodies as increasingly controllable [Blueprint](#) ,2007 *The Rhetoric of Dystopia* Christopher Carter, 2024-06-10 The Rhetoric of Dystopia develops an idea of emergent metalepsis that describes the uncanny moments where fictive texts anticipate material events blurring the boundary between the storyworld and the world of reception Christopher Carter treats dystopia
