

Applications panes

Use the applications panes to get quick access to applications in your phone. You can also customise your panes. Remember that applications panes extend beyond the regular screen dimensions, so you might have to flick left or right to see everything.

- An indicator at the top of the screen shows which of the applications panes you are in. For example, (X)(X)(X) indicates you are in the middle applications pane.

To open the applications panes

There are two ways to open the applications panes:

- From the Home screen, drag  upwards.
- Flick upwards from any location on the Home screen.

To traverse the applications panes

- From the applications panes, flick right or left.

To move an application

1. From the Home screen, drag  upwards.
 2. Touch and hold an item until application icons appear in four corners of the screen.
 3. Drag the item into one of the corners, or into another applications pane.
- The items in the applications panes are the actual applications, and are not shortcuts. So if you move an item from one applications pane to another location, you are moving the actual application, and not creating a shortcut.
