Soul A Cosmology Cosmology Trilogy:

Prayers for the Souls of all Cosmic Debris Sailor Stone, *Soul* Joseph Grange, 2012-01-02 Contemporary culture is soulless A dead concept to contemporary thinkers Soul has been displaced by philosophical and scientific abstracts Yet argues Joseph Grange in this timely and thought provoking book without Soul we are left defenseless against the negative constructs of our culture neither matter nor mind nor brain nor consciousness has the power to restore the quickness of our existence Indeed without Soul ethics particularly honesty easily turns into its opposites spin sophistry artful deception Providing a speculative systematic cosmology based on the methodology developed by Alfred North Whitehead and referencing a variety of philosophers Western and Eastern classic and contemporary Grange offers an understanding of Soul as expression Grange lays out the basic characteristics of Soul as transformative social and conscious power and goes on to discuss the possibility of mystical reason and experience Actual steps to reconstruct Soul including meditation are offered Spinoza s Ethics Vipassana meditation and Cognitive Behavioral Therapy are shown to have particular resources for soul transformation This volume concludes Grange s trilogy of cosmologies Nature An Environmental Cosmology and The City An Urban Cosmology discussed the natural environment and the cultural environment The Soul complements these with an account of the spiritual environment

The Soul's Upward Yearning Robert Spitzer, 2015-08-10 Since the early twentieth century scientific materialism has so undermined our belief in the human capacity for transcendence that many people find it difficult to believe in God and the human soul The materialist perspective has not only cast its spell on the natural sciences psychology philosophy and literature it has also enthralled popular culture which offers very little to encourage the soul s upward yearning There are many signs of the widespread loss of confidence in our ability to soar upward and these have been noted by thinkers as diverse as Carl Jung psychiatrist Mircea Eliade historian of religion Gabriel Marcel philosopher and authors C S Lewis and J R R Tolkien Their observations were validated by a 2004 study published in the American Journal of Psychiatry that linked the absence of religion with a marked increase in suicide meaninglessness substance abuse separation from family members and other psychological problems Thus the loss of transcendence is negatively affecting an entire society It is stealing from countless individuals their sense of happiness dignity ideals virtues and destiny Ironically the evidence for transcendence is greater today than in any other period in history The problem is this evidence has not been compiled and made widely available a challenge Father Spitzer aspires to meet with this book Father Spitzer s work provides a bright light in the midst of the darkness by presenting traditional and contemporary evidence for God and a transphysical soul from several major sources It shows that we are transcendent beings with souls capable of surviving bodily death that we are self reflective beings aware of and able to strive toward perfect truth love goodness and beauty that we have the dignity of being created in the very image of God If we underestimate these truths we undervalue one another underlive our lives and underachieve our destiny

Cosmic Consciousness Susana Victoria Leon Charreau de Lluberas,2023-07-26 Cosmic Consciousness The Work Cosmic Consciousness is a tetralogy of books 1 The Awakening 2 The Understanding 3 The Cure 4 The Integral Being psychographically transmitted by the Blessings and Light Spiritual Team from 2008 to 2016 This work is a way to evolve within a broader awareness of the integrality of Being In every evolution several paths appear and each being will be prepared to follow the most appropriate to its own mission The following of a certain path will be given by the free will and the preparation of each one The work is not limited to the threedimensional it is not limited to the here and now It has in its essence what is necessary for each dimension and it will be understood by each being according to the energetic level in which it is determined by its own evolution A work is often not prepared for the present moment of many people but you can be sure that this work is prepared for these times and for times to come The divine spark that gave you birth has cosmic integrity but today it is limited by each individuality There is no cure if we do not treat the Being in its entirety Healing is the return of the Being to its own balance in each energetic state of its divine essence from which it moved away by free will in its multiple existences transforming its society its world the atmosphere where it breathes and thus determining its past present and future as a multidimensional being Trace your passage through the extraordinary adventure of life Eternal journey

Unifying Heaven and Earth. Essays in the History of Early Modern Cosmology Miguel Á. Granada,Patrick J. Boner & Dario Tessicini,2016-05-26 One of the most significant events in the history of Western civilization was the cosmological revolution of the 16th and 17th centuries Among the most salient factors in this change described by Alexandre Koyr as the destruction of the cosmos inherited from ancient Greece were Copernican heliocentrism and the substitution of a homogeneous universe for the hierarchical cosmos of the Platonic and Aristotelian tradition Starting with a new approach to the issue of the presence of Islamic astronomical devices in Copernicus work and a thorough reappraisal of the cosmological views of Paracelsus the book deals mainly with the abolition of cosmological dualism and the ways in which it affected the decline of astrology over the 17th century Other related topics include planetary order and theories of world harmony the cause of planetary motion in the Tyconic world system or the discussion on comets in Germany through the first presentation of a manuscript treatise by Michael Maestlin on the great comet of 1618
