James Essig

Soul Innermost Eternal Sparkling Diamond:

The Soul James Essig,2017-03-31 I thought that you as reader would enjoy this writing on the great dignity of the human soul This book offers a sharp contrast to the main topics on which I tend to post and was written and compiled from my heart I have often posted articles on extremely manned starship technologies and as a physicist I will continue to do such However I offer this rather long article as a sharing of my personal belief in the transcendent dignity of every human person and by corollary that of any of our ETI brothers and sisters With modern technological capabilities to monitor the various emotional and mental states of test subjects and the ability to measure and experimentally probe the electric and magnetic fields generated within the human body we sometimes are tempted to view the human soul as some form of corruptible energy field We long for a rekindling of a sense of mystery regarding the ephemeral reality of the human soul This book is motivated as an attempt to restore a sense of mystery in the minds and hearts of any and all persons who will read this post regarding that aspect of our human nature that seems to be beyond validation by modern science technology and medicine and which seems to defy certain and precise explanation by philosophers theologians and clergyman alike The Soul James M.

Essig,2015-01-31 At some fundamental level of reality the number of possible relation based features and by corollary also the number of actual features of a given human soul can grow and will grow for all eternity This affirmation implies an eternal growth beyond imaging of each human soul and by corollary the size of the spiritual cosmos In some sense each new characteristic is as if a creation all to its own although not an entire personal creation None the less we can have hope that the size of the spiritual cosmos will at the very least eternally grow in unfathomable manners commensurate with the relation based features growth of each human soul and by corollary also each and every extraterrestrial person soul and each and every ultra terrestrial person soul This book includes a set theory type expounding on the indefinite possibilities for each soul to forever experience existential growth into the boundless and fathomless depths of future eternity The Soul James M.

Essig,2016-08-31 The new concepts disclosed in this book as almost all of my new concepts occurred more or less in a state of relaxed undisciplined free association In this volume I introduce a content related to the subject of a core of the soul Accordingly each spiritual and immortal soul would have a existential core or existentially innermost aspect The core of the soul would be akin to the essence of the substance of the soul Another way to view any existential core of the soul would be to frame the concept in terms of the heart of the soul or the innermost recesses of the soul I go further to formulate Set Theory based expressions for the number of possible intra soul relations of the core of the soul with the rest of the soul

The Soul: Our Innermost Eternal Sparkling Diamond. PART 15. Second Edition James Essig,2015-05-01 This book as the Second Edition is almost identical to the first edition and includes change of font size for readability Herein novel formulas for describing the souls of Human Persons and any bodily extraterrestrial and ultra terrestrial persons are presented

The Soul: Our Innermost Eternal Sparkling Diamond. PART 20 James Essig,2015-06-01 The Human Soul

is an odd reality The identity of each Soul is simple yet each soul has perhaps an unlimited number of features perhaps vastly infinitely so So each soul has an identity or a principle of identity despite having an enormously complex existential structure and as for as the faculties and accidental properties to say the least also an enormously complex ontological structure The unifying principle or one ness of each soul is paradoxical in light of the structural complexity of the Soul In order to manifest one ness of human personal sentient identity this one ness or self ness principle of each Human Soul has to be profoundly so so it seems in order to maintain cohesive personal sentient identity and to ensure that a given souls accidental properties and features and semi substantial or facultative properties and features belong to a given soul and not another soul Thus the one ness of each soul seems almost as if the personal identity of each soul is super unitary or more one than one My reasoning is that if the soul is one then the soul must be extremely one given the potential enormously complex nature of the accidental and facultative composition of the soul

The Soul: Our Innermost Eternal Sparkling Diamond. PART 9 James Essig,2014-12-14 Herein Part 9 I offer a possible way around the conundrum of the notion of a spiritual and immortal soul but yet the extreme causal coupling between even the most advanced cognitive and volitional behavior of human persons in this life I provide a perhaps more scientifically balanced consideration of the immortality of the human soul from the standpoint of being a Catholic physicist which seems to me much more sensible than the ancient Greek or Scholastic approaches of perhaps dated traditional Catholic theological approaches The living human body is suffuse with electrodynamic and electrochemical activity Magnetic fields extend out from the human body and can be measured Electrical potentials are routinely measured along the skin of a living human body The human brain energy states have a very high correlation with the most advanced cognitive and volitional activity Thus the conscious principles of the living human person are strongly coupled with neuro physical activity The leads us to a profound question for Catholic spiritual anthropologists Is the human soul related to the electromagnetic force and if so how Traditional Catholic theology holds that the human soul is spiritual and immortal and by some accounts created directly by GOD at the moment of conception ex nihilo Scholastic theologians assert that the human soul is the substantial form of the human body in the Platonic or Aristotelian sense of the word form Contemporary theological approaches to the ontology of the human soul are somewhat ambivalent to the extreme dualism of Scholasticism and ancient Greek interpretations of the human soul So who is right and what objective evidence do we have to go on regarding the human soul We can safely state that conscious human processes even the most advanced ones have been shown to be highly coupled to human brain energy states This can be seen in the large numbers of brain injuries and cases of diagnosed psychophysical decline in the aged that have been studied over the past century or more The observation of human test subjects performing mental or emotional tasks by modern imaging methods have clearly demonstrated a causal relationship between even the most advanced cognitive and volitional processes and specific types of brain energy states

The Soul James Essig,2015-03-15 In this volume we cover the notion of the explosive power of

creation of the human soul as a time dependent process for the realization of the latent potentiality and latent possibilities of each human soul and its potential growth for all eternity The possibilities of continuous or supercontinuous time in GOD s reference frame allow for the possibility of literally instantaneous creation of each human soul in GOD s reference frame and in GOD s time The explosion of the creation of each human soul is a profoundly abstract but whimsical concept and thus alludes to the enormous even that each creation of a soul is In a way the power of these soul explosions further alludes to the great ontological energy that is each human soul and the ontological power for existence latent in each human soul and that is inherent in the very nature of each human soul

The Soul James M. Essig,2015-09-13 We can all relate to the affirmation that occasionally we encounter a beautiful person Accordingly just as a young ardent romantic voluptuous and intelligent woman can be said to be beautiful we can likewise consider the current and potential beauty of every human soul every bodily extraterrestrial species souls and every bodily ultraterrestrial species souls Such soul beauties are likely huge in number commensurate with the complexity of the structures of each soul even though each soul is a unity and presumably simple The number of beauties and or potential beauties of each soul is a function of the following operator f Beauty Enhancement g substantial structure h faculties of will intellect sensibility and memory k conscious subconscious unconscious ultra unconscious m ego superego ID n intellectual life sensitive life vegetative life Thus the above operator itself a function is actually a compound function of the following sub function f Beauty Enhancement g substantial structure h faculties of will intellect sensibility and memory k conscious subconscious unconscious ultra unconscious m ego superego ID and n intellectual life sensitive life vegetative life This makes sense because each of the modifying expressions associated with each sub function potentially represents aspects of the soul which in and of themselves also have a structure The Human Soul is an odd reality The identity of each Soul is simple yet each soul has perhaps an unlimited number of features perhaps vastly infinitely so So each soul has an identity or a principle of identity despite having an enormously complex existential structure and as for as the faculties and accidental properties to say the least also an enormously complex ontological structure The above operator is affixed to the basic expressions for the number of soul features or soul potential features as borrowed from previous books in this series The unifying principle or oneness of each soul is paradoxical in light of the structural complexity of the Soul To learn more I invite you to read this book

The Soul James M. Essig,2015-11-05 An interesting topic for consideration is the mechanism by which each soul of the deceased stays together or remains congealed so as not to dissolve decay or fade out of existence without union with a living body Such an existential anchor of the integrity of the soul would be something special and would perhaps be the most primitive or existential grounding principle of and within the soul The existential congealing principle would be of primary importance in the natural immortality of each and every human soul In a sense the congealing principle alludes to its existential transcendence of the ontology of the semi substantial aspects of the soul or faculties and of the purely accidental aspects of each soul The self

congealing mechanism of the soul may even have primacy and transcendence over and of the substance of each and every human soul I consider the following functional operator to define the extent of the existential transcendence of the congealing principle of the soul with respect to the substance faculties and accidental aspects of each soul The operator also considers such transcendence regarding the ultra unconscious unconscious sub conscious and consciousness of each soul as well as the heuristics of the ID ego and super ego but also the vegetative sensitive and intellectual life of each soul f Context Specific congeal transcendence Substance faculties and accidental aspects ultra unconscious unconscious subconscious consciousness ID ego and super ego vegetative sensitive and intellectual life The above operator is context specific as indicated near its beginning This thus allows for the operator to have differing values based on the context of the specific expressions it is a part of Herein we consider the magnitude or scope of the congealing principle of the soul including but not limited to the transcendence of the congealing principle as a function of the second existential portion completion derivative of the first and second time derivatives of the power of the creation of a Soul based on the potential number of potential relation based ways the Human Soul can be characterized by the capacity of the Human Soul to come into existence based on the ever growing the number of situational world lines that a given Human Soul a given ET soul or a given UT soul can transcend taking into about the set of physical microstates and objective emotional states for the future potential aggregated created population of souls as such where for each soul the number of objective emotional states is defined We preface the above mentioned operator to expressions for the second existential portion completion derivatives of the first and second time derivatives of the power of the creation of the human soul to indicate the scope of the congealing principle so considered *The Soul: Our Innermost Eternal Sparkling Diamond. PART 22* James Essig, 2015-07-22 Suppose that each human soul that ends up being condemned receives such punishment for eternity implying the traditionally stated eternity of the punishment of Hell Since such punishment is an eternal state the implication is that the conscious sentient identity or the who of the Soul per dues eternally even amidst the reality of the harsh punishments of an eternal Hell Such eternal punishments and the eternally existential conveyance of the Human Soul says something extreme in terms of the extent or degree of natural immortality and incorruptibility of each Human Soul most specifically the Souls in Hell The natural immortality of each human soul herein is interpreted as a substantial first created essence wise manifestation of the natural created substance of the soul or perhaps if not then the alteration of the substance of each soul by the merits of Christ Incarnation Life Passion Crucifixion Death Resurrection and Ascension as universally applicable to all human Souls condemned or saved or consigned eternally to any Limbo However I must assert that one should strive to avoid Hell at all personal costs The reason for and reality of Hell is a great mystery but none the less it is not a fun place to go So definitely strive for eternal salvation so that you can enjoy the mysteries and intrigue of absolutely all Souls whether Human Prehistoric Hominid Extraterrestrial or Ultraterrestrial in nature Heaven is definitely a lot more fun than Hell So do not be lax in your

moral life and do lots of acts of charity for others for those in your own family and extended family for your friends classmates coworkers and comrades and even for your enemies The Human Soul is an odd reality The identity of each Soul is simple yet each soul has perhaps an unlimited number of features perhaps vastly infinitely so So each soul has an identity or a principle of identity despite having an enormously complex existential structure and as for as the faculties and accidental properties to say the least also an enormously complex ontological structure The unifying principle or one ness of each soul is paradoxical in light of the structural complexity of the Soul In order to manifest one ness of human personal sentient identity this one ness or self ness principle of each Human Soul has to be profoundly so so it seems in order to maintain cohesive personal sentient identity and to ensure that a given souls accidental properties and features and semi substantial or facultative properties and features belong to a given soul and not another soul Thus the one ness of each soul seems almost as if the personal identity of each soul is super unitary or more one than one My reasoning is that if the soul is one then the soul must be extremely one given the potential enormously complex nature of the accidental and facultative composition of the soul Now each differential existential element of the human soul may plausibly have its own set of characteristics Each of these characteristics can be said to by a bit of information To find out more I welcome you to read this book GOD BLESS Jim
