Supernumerary Intelligence A New Approach To Analytics For Management:

Supernumerary Intelligence John W. Dickey, Ian A. Birdsall, G. Richard Larkin, Kwang Sik Kim, 2015-02-01 Much of our life is consumed looking for quantitative relationships For example How much more sleep do I need at night to make me feel better How many calories do I need to eliminate to lose weight How much larger does my budget on the job need to be for me to be more effective All these quantitative questions are preceded and depend on qualitative questions For example before I decide how much extra sleep I need at night I need to determine if extra sleep will actually make me feel better In another example I need to determine if a larger budget will make me more effective on the job before I think about how much more money I will need What elements influence job performance and how do they interact We spend much of our life trying to find answers to such quantitative and qualitative questions We are then in search of a kind of intelligence that includes numbers but is also above and beyond them We call it supernumerary intelligence SI To aid our quest for SI we use Quantitative CyberQuest QCQ and the Public Administration Genome Project PAGP as useful tools QCQ is a philosophy as well as an analytic tool that helps in exploring the supernumerary QCQ is particularly well suited for sorting out variables as well as their interrelations It involves a combination of statistics systems analysis research methodology qualitative research and artificial intelligence QCQ also provides a relatively easy to understand but still powerful set of tools and guidance mechanisms to pilot the Cyber part users in their Quest for supernumerary relationships Plan Prediction Ray Wyatt, 2016-11-19 This book develops an innovative system in the form of an app that harnesses the power of the internet to predict which sorts of people will prefer which policy in ANY planning situation It chronicles the accumulated research wisdom behind the system s reasoning along with several less successful approaches to policy making that have been found wanting in the past including the myth usually peddled by strategic planners that it is possible to find a best plan which optimally satisfies everybody The book lays out an entirely new kind of Planning Support System PSS It will facilitate decision making that is far more community sensitive than previously and it will drastically improve the performance of anyone who needs to plan within socially sensitive contexts which is all of us A standout feature of the system is its commitment to scientific rigour as shown by its predicted plan scores always being graphically presented within error margins so that true statistical significance is instantly observable Moreover the probabilities that its predictions are correct are always shown a refreshing change from most if not all other Decision Support Systems DSS that simply expect users to accept their outputs on faith alone INNOVATIVE APPROACHES IN FORENSIC SCIENCE: SCIENTIFIC METHODS, TECHNOLOGY, AND EVIDENCE MANAGEMENT Duygu Yeşim Ovat , Melike Aydoğdu, Serap Anette Aygür, Mert Ocak, Cumali Çatak, Harun Şener, Hatice Soytürk, Ceren Akgündüz Ayrancıoğlu, Mehmet Ali Kılıçarslan , Fatma Çavuş Yonar , Asena Avcı Akca , Preface Forensic science is an interdisciplinary field that plays a crucial role in the pursuit of requirement advancements truth of in a fundamental justice science Rapid and technology have introduced significant innovations in methods and techniques for
