Support Vector Machines Ingo Steinwart, Andreas Christmann, 2008-09-15 Every mathematical discipline goes through three periods of development the naive the formal and the critical David Hilbert The goal of this book is to explain the principles that made support vector machines SVMs a successful modeling and prediction tool for a variety of applications We try to achieve this by presenting the basic ideas of SVMs together with the latest developments and current research questions in a unified style In a nutshell we identify at least three reasons for the success of SVMs their ability to learn well with only a very small number of free parameters their robustness against several types of model violations and outliers and last but not least their computational efficiency compared with several other methods Although there are several roots and precursors of SVMs these methods gained particular momentum during the last 15 years since Vapnik 1995 1998 published his well known textbooks on statistical learning theory with a special emphasis on support vector machines Since then the field of machine learning has witnessed intense activity in the study of SVMs which has spread more and more to other disciplines such as statistics and mathematics Thus it seems fair to say that several communities are currently working on support vector machines and on related kernel based methods Although there are many interactions between these communities we think that there is still room for additional fruitful interaction and would be glad if this textbook were found helpful in stimulating further research Many of the results presented in this book have previously been scattered in the journal literature or are still under review As a consequence these results have been accessible only to a relatively small number of specialists sometimes probably only to people from one community but not the others

Artificial Intelligence, Big Data and Data Science in Statistics Ansgar Steland, Kwok-Leung Tsui, 2022-11-15 This book discusses the interplay between statistics data science machine learning and artificial intelligence with a focus on environmental science the natural sciences and technology It covers the state of the art from both a theoretical and a practical viewpoint and describes how to successfully apply machine learning methods demonstrating the benefits of statistics for modeling and analyzing high dimensional and big data The book's expert contributions include theoretical studies of machine learning methods expositions of general methodologies for sound statistical analyses of data as well as novel approaches to modeling and analyzing data for specific problems and areas In terms of applications the contributions deal with data as arising in industrial quality control autonomous driving transportation and traffic chip manufacturing photovoltaics football transmission of infectious diseases Covid 19 and public health The book will appeal to statisticians and data scientists as well as engineers and computer scientists working in related fields or applications

Regularization, Optimization, Kernels, and Support Vector Machines Johan A.K. Suykens, Marco Signoretto, Andreas Argyriou, 2014-10-23 Regularization Optimization Kernels and Support Vector Machines offers a snapshot of the current state of the art of large scale machine learning providing a single multidisciplinary source for the latest research and advances in regularization sparsity compressed sensing convex and large scale optimization kernel methods and support vector

Classification Methods for Remotely Sensed Data Taskin Kavzoglu, Brandt Tso, Paul M. Mather, 2024-09-04 The third edition of the bestselling Classification Methods for Remotely Sensed Data covers current state of the art machine learning algorithms and developments in the analysis of remotely sensed data This book is thoroughly updated to meet the needs of readers today and provides six new chapters on deep learning feature extraction and selection multisource image fusion hyperparameter optimization accuracy assessment with model explainability and object based image analysis which is relatively a new paradigm in image processing and classification It presents new AI based analysis tools and metrics together with ongoing debates on accuracy assessment strategies and XAI methods New in this edition Provides comprehensive background on the theory of deep learning and its application to remote sensing data Includes a chapter on hyperparameter optimization techniques to guarantee the highest performance in classification applications Outlines the latest strategies and accuracy measures in accuracy assessment and summarizes accuracy metrics and assessment strategies Discusses the methods used for explaining inherent structures and weighing the features of ML and AI algorithms that are critical for explaining the robustness of the models This book is intended for industry professionals researchers academics and graduate students who want a thorough and up to date guide to the many and varied techniques of image classification applied in the fields of

geography geospatial and earth sciences electronic and computer science environmental engineering etc Pattern Recognition And Big Data Sankar Kumar Pal, Amita Pal, 2016-12-15 Containing twenty six contributions by experts from all over the world this book presents both research and review material describing the evolution and recent developments of various pattern recognition methodologies ranging from statistical linguistic fuzzy set theoretic neural evolutionary computing and rough set theoretic to hybrid soft computing with significant real life applications Pattern Recognition and Big Data provides state of the art classical and modern approaches to pattern recognition and mining with extensive real life applications The book describes efficient soft and robust machine learning algorithms and granular computing techniques for data mining and knowledge discovery and the issues associated with handling Big Data Application domains considered include bioinformatics cognitive machines or machine mind developments biometrics computer vision the e nose remote sensing and social network analysis **Gentle Introduction To Support Vector Machines In Biomedicine, A - Volume 1: Theory And Methods** Alexander Statnikov, Constantin F Aliferis, Douglas P Hardin, Isabelle Guyon, 2011-02-22 Support Vector Machines SVMs are among the most important recent developments in pattern recognition and statistical machine learning They have found a great range of applications in various fields including biology and medicine However biomedical researchers often experience difficulties grasping both the theory and applications of these important methods because of lack of technical background The purpose of this book is to introduce SVMs and their extensions and allow biomedical researchers to understand and apply them in real life research in a very easy manner The book is to consist of two volumes theory and methods Volume 1 and case studies Volume 2 **Data Mining** Florin Gorunescu, 2011-03-10 The knowledge discovery process is as old as Homo sapiens Until some time ago this process was solely based on the natural personal computer provided by Mother Nature Fortunately in recent decades the problem has begun to be solved based on the development of the Data mining technology aided by the huge computational power of the artificial computers Digging intelligently in different large databases data mining aims to extract implicit previously unknown and potentially useful information from data since knowledge is power The goal of this book is to provide in a friendly way both theoretical concepts and especially practical techniques of this exciting field ready to be applied in real world situations Accordingly it is meant for all those who wish to learn how to explore and analysis of large quantities of data in order to discover the hidden nugget of information **Advances in Data Mining: Applications and Theoretical Aspects** Petra Perner, 2010-07-05 These are the proceedings of the tenth event of the Industrial Conference on Data Mining ICDM held in Berlin www data mining forum de For this edition the Program Committee received 175 submissions After the peer review process we accepted 49 high quality papers for oral presentation that are included in this book The topics range from theoretical aspects of data mining to applications of data mining such as on multimedia data in marketing finance and telecommunication in medicine and agriculture and in process control industry and society Extended versions of selected papers will appear in the international

journal Transactions on Machine Learning and Data Mining www.ibai-publishing.org/journal/mldm Ten papers were selected for poster presentations and are published in the ICDM Poster Proceeding Volume by ibai publishing www.ibai-publishing.org In conjunction with ICDM four workshops were held on special hot application oriented topics in data mining Data Mining in Marketing DMM Data Mining in LifeScience DMLS the Workshop on Case Based Reasoning for Multimedia Data CBR MD and the Workshop on Data Mining in Agriculture DMA The Workshop on Data Mining in Agriculture ran for the first time this year All workshop papers will be published in the workshop proceedings by ibai publishing www.ibai-publishing.org Selected papers of CBR MD will be published in a special issue of the international journal Transactions on Case Based Reasoning www.ibai-publishing.org/journal/cbr

Big Data Analysis and Artificial Intelligence for Medical Sciences Bruno Carpentieri, Paola Lecca, 2024-05-13 Big Data Analysis and Artificial Intelligence for Medical Sciences Overview of the current state of the art on the use of artificial intelligence in medicine and biology Big Data Analysis and Artificial Intelligence for Medical Sciences demonstrates the efforts made in the fields of Computational Biology and medical sciences to design and implement robust accurate and efficient computer algorithms for modeling the behavior of complex biological systems much faster than using traditional modeling approaches based solely on theory With chapters written by international experts in the field of medical and biological research Big Data Analysis and Artificial Intelligence for Medical Sciences includes information on Studies conducted by the authors which are the result of years of interdisciplinary collaborations with clinicians computer scientists mathematicians and engineers Differences between traditional computational approaches to data processing those of mathematical biology versus the experiment data theory model validation cycle Existing approaches to the use of big data in the healthcare industry such as through IBM's Watson Oncology Microsoft's Hanover and Google's DeepMind Difficulties in the field that have arisen as a result of technological changes and potential future directions these changes may take A timely and up to date resource on the integration of artificial intelligence in medicine and biology Big Data Analysis and Artificial Intelligence for Medical Sciences is of great benefit not only to professional scholars but also MSc or PhD program students eager to explore advancement in the field
