Ecology and Literatures in English Françoise Besson,2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare s theatre to ecopoetics from travel writing to detective novels from children s books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts

The Measured Word Kurt Brown,2001 Though the interests of science and art frequently seem to inhabit opposite poles The Measured Word assembles a brilliant anthology of twelve essays that illumine the historic and newly emerging relationships between the poetic and scientific imaginations Assembling the writings of leading contemporary poets essayists and thinkers Kurt Brown highlights ways in which poets use scientific discoveries and mathematical ideas to their artistic advantage and offers insight on the recently apparent integration of technology and other discoveries into the postmodernist poetry Here are meditations on the similarities and differences between the poetic and scientific imagination on the poetic use of fractals on hypertext on the changing shape of poetry in the scientific age

Commentary by Czech poet and immunologist Miroslav Holub Paul Lake Alison Hawthorne Deming Alice Fulton Forrest Gander and Stephanie Strickland among others presents a diverse selection of opinions These viewpoints are complemented by many careful innovative readings of individual poems informed by the sciences The writings in this collection not only celebrate the advent of a new age of discovery but also identify the need for a revision of the western thinking that separates the mind and the heart replacing division with the reciprocity of mutual
