PREFACE The Tibetan medical system more popularly known as Sowa Rigpa Knowledge of Healing is undoubtedly as old as Tibetan civilization itself The earliest inhabitants of Tibet were confronted with a host of difficulties due to the way they had to live during those ancient times The only means of sustenance and survival was to rely on the various natural resources around them These early people gradually learned the uses and medical efficacy of natural resources The inherent discernment of these early people led them to discover natural remedies for various healthrelated problems Their innate urge to overcome physical discomfort combined with their curiosity about the world around them made them create some effective natural remedies for many common illnesses Drinking and sprinkling cold water against fever compressing cold stone on an inflamed swelling using heated oil to stop bleeding drinking hot water for indigestion eating boiled foods rather than eating them raw these insights¹ and many others have proven their effectiveness and have continued to be of use even to this day The development of the Tibetan science of healing is based on the wisdom of such ancient medical practices The application of a medical remedy against poisoning² as pronounced by Tsiblhya Karma Yolde to the first king of Tibet Nyatri Tsenpo circa 300 B C clearly demonstrates that the early inhabitants of Tibet had knowledge of the therapeutic value of herbs and minerals even during that time Medical knowledge continued to be passed on by means of various oral traditions and has kept alive the knowledge of numerous remedies over many centuries Before Buddhism and the present Tibetan script were introduced to Tibet the Bon religious and cultural traditions flourished in the region of Shang Shung in southwestern Tibet The legendary Bon master and cultural founder Tonpa Shenrab Miwoche was born in Purang Tibet at the time of the Lord Buddha The Bon master authored many important medical literatures such as Sojay Kyi Do Ghu Sorig Chegyud Daser Sojay Nadbum Nagpo³ Sojay Manbum Karp⁴ Sothab Chedbum Trawo⁵ and Tsawa Thukbum Khangon⁶ and he established the foundation for the development of the Bon medical tradition His eldest son Chebu Trishey learned the

art of medicine from his father and later became a very important figure in the development of the Bon medical system At that time Bon religion and culture were at their height and shamanistic ways of healing were very popular throughout Tibet They undoubtedly influenced the existing Tibetan medical knowledge and practices The Gyueshi Four Tantras which is the fundamental text of Tibetan medicine contains mantras and the names of some medicinal substances compounds and diseases in the original Bon language This is a clear indication of the influence of Bon on Tibetan medicine We can therefore assume that there was knowledge and practices of medicine before the reign of King Lha Thothori Nyentsen and before the introduction of the present Tibetan script during the 7th century
