The Fundamental Concepts Of Metaphysics World Finitude Solitude:

The Fundamental Concepts of Metaphysics Martin Heidegger, 1996-01-22 an important addition to the translations of Heidegger's lecture courses Heidegger's voice can be heard with few of the jolting Germanicisms with which so many translations of Heidegger's texts have been burdened International Philosophical Quarterly The translators of these lectures have succeeded splendidly in giving readers an intimation of the tensely insistent tone of the original German Heidegger's concern with a linguistic preconsciousness and with our entrancement before the enigma of existence remains intensely contemporary Choice There is much that is new and valuable in this book and McNeill and Walker's faithful translation makes it very accessible Review of Metaphysics Whoever thought that Heidegger has no surprises left in him had better read this volume If its rhetoric is hard and heavy its thought is even harder and essentially more daring than Heideggerians ever imagined Heidegger could be David Farrell Krell First published in German in 1938 as volume 29/30 of Heidegger's collected works The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature Heidegger's concepts of organism animal behavior and environment are uniquely developed and defined with intensity This work the text of Martin Heidegger's lecture course of 1929/30 is crucial for an understanding of Heidegger's transition from the major work of his early years Being and Time to his later preoccupations with language truth and history First published in German in 1983 as volume 29/30 of Heidegger's collected works The Fundamental Concepts of Metaphysics includes an extended treatment of the history of metaphysics and an elaboration of a philosophy of life and nature Heidegger's concepts of organism animal behavior and environment are uniquely developed and defined with intensity

An Artificial History of Natural Intelligence David W. Bates,2024-04-02 A new history of human intelligence that argues that humans know themselves by knowing their machines We imagine that we are both in control of and controlled by our bodies autonomous and yet automatic This entanglement according to David W Bates emerged in the seventeenth century when humans first built and compared themselves with machines Reading varied thinkers from Descartes to Kant to Turing Bates reveals how time and time again technological developments offered new ways to imagine how the body s automaticity worked alongside the mind s autonomy Tracing these evolving lines of thought An Artificial History of Natural Intelligence offers a new theorization of the human as a being that is dependent on technology and produces itself as an artificial automaton without a natural outside origin

Time and the Everyday in Slow Cinema Rosa Barotsi,2025-07-08 Time and the Everyday in Slow Cinema examines the phenomenon of Slow cinema a style defined by its lingering focus on quotidian activities and extended durations Rosa Barotsi argues that while the style emerges from a tradition of durational filmmaking and resonates with movements advocating for deceleration it is also deeply entangled in the structures of late capitalism creating a dynamic tension between radicalism and conservatism This book situates the trend between artistic innovation and institutional commodification ultimately raising critical questions about spectatorship cinematic time and the politics of cultural value

Leadership Meta-Competencies Dimitris Bourantas,Vasia Agapitou,2016-04-22 This book doesn t offer overrated success stories which in most cases cannot be imitated It contains no check lists or recipes for success and it presents no theoretically based models The meta competencies discussed in this refreshing book are timeless virtues of which effective leaders seem to possess but which are rarely if ever included in lists of competencies in the vast business leadership literature They include Existential intelligence distinct from the much discussed emotional intelligence is about the ability to pose questions and reflect on fundamental issues in ways that develop a mature ability to interpret the world and better understand other people Phronesis is the ability to exercise sound judgement based on skilful application of moral and political rationality Solitude is a voluntary state achieved when an individual has the ability to momentarily withdraw and be free of external pressures and demands in order to concentrate on desired mental cognitive activities Trust building is more often discussed in leadership literature As a leadership competence it is about the ability to be credible show trust in and respect for other people and inspire trust For the curious business practitioner business student or business educator wishing to consider aspects of leadership competence that have to some extent been hidden or forgotten this book introduces the notion of meta competences and

deals in detail with them **The Ends of History** Amy Swiffen, Joshua Nichols, 2013-05-02 The Ends of History considers how despite the fact that events in the past 20 years have called Francis Fukuyama's infamous announcement of the end of history into question the issue of the end of history is now a matter of renewed interest and debate Two decades ago we were confronted by the end of the Soviet Union and collapse of the geo political divisions that had defined much of the twentieth century From this particular end the end of history was proclaimed But is it still possible to argue that liberal democracy and free market capitalism are the final form of law and mode of production in human history Recent events have called this thesis into question from 9 11 and the War on Terror to the current global economic collapse and looming ecological crises it seems that history is far from over And yet oddly enough the question of the end has returned For example in the often predicted but still uncertain establishment of either a new international American Empire or a new era of International Law and the global resurgence of religion as a dominant source of political identification On the other hand perhaps the end is still yet to come slowly accumulating mustering at the periphery of the geo political landscape and outside the productive sphere Responses taking up these questions range from a return to Universalism political theology Messianism and even the old specter of communism This volume assesses these responses exploring what is at stake in proclaiming the end in the current historical moment Is it a matter of reading the writing on the wall Or is the proclamation itself a political act Furthermore is there a desire for the end In addressing these questions the contributors to The Ends of History confront the various ends that we now live and in so doing they open new lines of sight into the future **Theorising the Project**

Michael Tawa, 2020-05-15 Theorising the Project aims to explore a thematic approach to architectural design It conceptualises the design process in a general sense through seven key phases developing a thematic framework and a line of inquiry to situate the project investigating the project brief and mapping the project site to unravel potential themes and questions situating technology as a formative condition for design analysing precedents from the arts literature and architecture to elaborate implications for design and considering representation as equally constitutive of the design undertaking Key themes which are unpacked using extensive etymologies and metaphorical associations include theory mapping the makeshift potentiality and agency The concepts of assemblage and emergence are developed to contextualise the design process and architectural settings as enabling infrastructures for thinking and practice The book contends that design is a matter of setting up strategic and productive thematic assemblages that are not directed to the translation or formal expression of meaning but to the framing of strategic and enabling conditions for emergent sense realised within the existential and material conditions of architecture Succinct analyses of precedents across several disciplines are used to foreground tectonic and compositional characteristics with adaptational capacity for space time materiality and architectural narrative The thematic framework of the book engages theoretical material by Giorgio Agamben Gilles Deleuze Martin Heidegger Francois Jullien Manuel De Landa and Jean Luc Nancy Illustrated with drawings and photographs by the author

Felt Time Marc Wittmann, 2016-02-12 An expert explores the riddle of subjective time from why time speeds up as we grow older to the connection between time and consciousness

Shadows of Being Jeffrey Andrew Barash, 2022 In a review of the work of Karl Jaspers composed several years before the publication of his book *Being and Time* Martin Heidegger suggested that the philosophical orientations of his period had made a wrong turn and skirted by the fundamental path of thought He suggested that instead of taking up a heritage of original questions his contemporaries had become preoccupied with secondary issues accepting as fundamental what was in fact only incidental In the years that followed Heidegger's promise to reorient philosophy in terms of the *Seinsfrage* the question of Being exercised a well known influence on successive generations of thinkers on a global scale The present book delves into the philosophical sources of this influence and raises the question whether Heidegger indeed made good on the promise to reveal for thought what is truly fundamental In proposing this investigation the author assumes that it is not sufficient to take Heidegger at his word but that it is necessary to scrutinize what is posited as fundamental in light of its broader implications above all for ethico political judgment and for historical reflection After addressing this question in the first part of the book the second part examines the significance of Heidegger's reorientation of philosophy through the prism of its critical reception in the thought of Hannah Arendt Emmanuel Levinas and Paul Ricoeur

Perjury and Pardon, Volume I Jacques Derrida, 2022-09-27 An inquiry into the problematic of perjury or lying and forgiveness from one of the most influential philosophers of the twentieth century One only ever asks forgiveness for what is unforgivable From this contradiction begins *Perjury and Pardon* a two year series of seminars given by Jacques Derrida at the cole des hautes tudes en sciences sociales in Paris in the late 1990s In these sessions Derrida focuses on the philosophical ethical juridical and political stakes of the concept of responsibility His primary goal is to develop what he calls a problematic of lying by studying diverse forms of betrayal infidelity denial false testimony perjury unkept promises desecration sacrilege and blasphemy Although forgiveness is a notion inherited from multiple traditions the process of forgiveness eludes those traditions disturbing the categories of knowledge sense history and law that attempt to circumscribe it Derrida insists on the unconditionality of forgiveness and shows how its complex temporality destabilizes all ideas of presence and even of subjecthood For Derrida forgiveness cannot be reduced to repentance punishment retribution or salvation and it is inseparable from and haunted by the notion of perjury Through close readings of Kant Kierkegaard Shakespeare Plato Jankl vitch Baudelaire and Kafka as well as biblical texts Derrida explores diverse notions of the evil or malignancy of lying while developing a complex account of forgiveness across different traditions

Daimon Life is life enhancing To read it is to become richer in world John Llewelyn Disclosure of Martin Heidegger's complicity with the National Socialist regime in 1933-34 has provoked virulent debate about the relationship between his politics and his philosophy Did Heidegger's philosophy exhibit a kind of organicism readily transformed into ideological blood and soil Or rather did his support of the Nazis betray a fundamental lack of loyalty to living things David Farrell Krell traces Heidegger's political authoritarianism to his failure to develop a constructive life philosophy his phobic reactions to other forms of being Krell details Heidegger's opposition to Lebensphilosophie as expressed in Being and Time in an important but little known lecture course on theoretical biology given in 1929-30 called The Basic Concepts of Metaphysics and in a recently published key text Contributions to Philosophy written in 1936-38 Although Heidegger's attempt to think through the problems of life sexual reproduction behavior environment and the ecosystem ultimately failed Krell contends that his methods of thinking nonetheless pose important tasks for our own thought Drawing on and away from Heidegger Krell expands on the topics of life death sexuality and spirit as these are treated by Freud Nietzsche Derrida and Irigaray Daimon Life addresses issues central to contemporary philosophies of politics gender ecology and theoretical biology Animal Philosophy Matthew Calarco, Peter Atterton, 2004-07-30 Animal Philosophy is the first text to look at the place and treatment of animals in Continental thought A collection of essential primary and secondary readings on the animal question it brings together contributions from the following key Continental thinkers Nietzsche Heidegger Bataille Levinas Foucault Deleuze Guattari Derrida Ferry Cixous and Irigaray Each reading is followed by commentary and analysis from a leading contemporary thinker The coverage of the subject is exceptionally broad ranging across perspectives that include existentialism poststructuralism postmodernism phenomenology and feminism This anthology is an invaluable one stop resource for anyone researching teaching or studying animal ethics and animal rights in the fields of philosophy cultural studies literary theory sociology environmental studies and gender and women's studies

Animality Zhao Jing, 2023-08-11 By addressing the Western understanding of the status and nature of animals and the relation of animals to the question of life this book provides a discourse on animality through an interdisciplinary investigation into various areas of humanities The nature of animals is explored by drawing on materials from literature art religion philosophy and political science focusing on discussions of animality about the classical culture of ancient Greece metaphysics and its application to debates on life Martin Heidegger's philosophical theories and biopolitics Although the distinctive difference between human beings from animals has long been emphasized the author argues that they are inseparable from one another to achieve understanding The interrogation of animality therefore provides a new perspective on the nature of human beings in this postmodern era Academics in Western literature literary theory literary criticism and comparative literature will find this work an insightful addition to debates in their respective fields whilst it will also help senior university students pursuing their studies

The Beast and the Sovereign, Volume II Jacques Derrida, 2017-02-02 Following on from *The Beast and the Sovereign Volume I* this book extends Jacques Derrida's exploration of the connections between animality and sovereignty In this second year of the seminar originally presented in 2002 2003 as the last course he would give before his death Derrida focuses on two markedly different texts Heidegger's 1929 1930 course *The Fundamental Concepts of Metaphysics* and Daniel Defoe's *Robinson Crusoe* As he moves back and forth between the two works Derrida pursues the relations between solitude insularity world violence boredom and death as they supposedly affect humans and animals in different ways Hitherto unnoticed or underappreciated aspects of *Robinson Crusoe* are brought out in strikingly original readings of questions such as Crusoe's belief in ghosts his learning to pray his parrot Poll and his reinvention of the wheel Crusoe's terror of being buried alive or swallowed alive by beasts or cannibals gives rise to a rich and provocative reflection on death burial and cremation in part provoked by a meditation on the death of Derrida's friend Maurice Blanchot Throughout these readings are juxtaposed with interpretations of Heidegger's concepts of world and finitude to produce a distinctively Derridean account that will continue to surprise his readers
