**The Routledge Research Companion to Shakespeare and Classical Literature** Sean Keilen,Nick Moschovakis,2017-03-31 In this wide ranging and ambitiously conceived Research Companion contributors explore Shakespeare's relationship to the classic in two broad senses The essays analyze Shakespeare's specific debts to classical works and weigh his classicism's likeness and unlikeness to that of others in his time they also evaluate the effects of that classical influence to assess the extent to which it is connected with whatever qualities still make Shakespeare himself a classic arguably the classic of modern world literature and drama The first sense of the classic which the volume addresses is the classical culture of Latin and Greek reading translation and imitation Education in the canon of pagan classics bound Shakespeare together with other writers in what was the dominant tradition of English and European poetry and drama up through the nineteenth and even well into the twentieth century Second and no less central is the idea of classics as such that of books whose perceived value exceeding that of most in their era justifies their protection against historical and cultural change The volume's organizing insight is that as Shakespeare was made a classic in this second antiquarian sense his work's reception has more and more come to resemble that of classics in the first sense of ancient texts subject to labored critical study by masses of professional interpreters who are needed to mediate their meaning simply because of the texts growing remoteness from ordinary life language and consciousness The volume presents overviews and argumentative essays about the presence of Latin and Greek literature in Shakespeare's writing They coexist in the volume with thought pieces on the uses of the classical as a historical and pedagogical category and with practical essays on the place of ancient classics in today's Shakespearean classrooms

**Stewardship and the Future of the Planet** Rachel Carnell,Chris Mounsey,2022-07-22 This volume examines historical views of stewardship that have sometimes allowed humans to ravage the earth as well as contemporary and futuristic visions of stewardship that will be necessary to achieve pragmatic progress to save life on earth as we know it The idea of stewardship human responsibility to tend the Earth has been central to human cultures throughout history as evident in the

Judeo Christian Genesis story of the Garden of Eden and in a diverse range of parallel tales from other traditions around the world Despite such foundational hortatory stories about preserving the earth on which we live humanity in the Anthropocene is nevertheless currently destroying the planet with breathtaking speed Much research on stewardship today in the disciplines of geography urban studies oceans research and green business practice offers insights that should help address the ecological challenges facing the planet Simultaneous scholarship in the humanities and other fields reminds us that the damage done to the planet has often been carried out in the name of tending the land In order to make progress in environmental stewardship scholars must speak to each other across the disciplinary boundaries as they do in this volume
