2025 Edition Entrepreneurship Roadmap:

The TOGAF® Standard, 10th Edition - Business Architecture - 2025 Update The Open Group, 2025-06-30

This document is a compilation of TOGAF Series Guides addressing Business Architecture. It has been developed and approved by The Open Group and is part of the TOGAF Standard 10th Edition. It consists of the following documents:

- TOGAF Series Guide Business Models**: This document provides a basis for Enterprise Architects to understand and utilize business models which describe the rationale of how an organization creates, delivers, and captures value. It covers the concept and purpose of business models and highlights the Business Model Canvas™ technique.
- TOGAF Series Guide Business Capabilities Version 2**: This document answers key questions about what a business capability is and how it is used to enhance business analysis and planning. It addresses how to provide the architect with a means to create a capability map and align it with other Business Architecture viewpoints in support of business planning processes.
- TOGAF Series Guide Value Streams**: Value streams are one of the core elements of a Business Architecture. This document provides an architected approach to developing a business value model. It addresses how to identify, define, model, and map a value stream to other key components of an enterprise's Business Architecture.
- TOGAF Series Guide Information Mapping**: This document describes how to develop an Information Map that articulates, characterizes, and visually represents information that is critical to the business. It provides architects with a framework to help understand what information matters most to a business before developing or proposing solutions.
- TOGAF Series Guide Organization Mapping**: This document shows how organization mapping provides the organizational context to an Enterprise Architecture. While capability mapping exposes what a business does and value stream mapping exposes how it delivers value to specific stakeholders, the organization map identifies the business units or third parties that possess or use those capabilities and which participate in the value streams.
- TOGAF Series Guide Business Scenarios**: This document describes the Business Scenarios technique, which provides a mechanism to fully understand the requirements of information technology and align it with business needs. It shows how Business Scenarios can be used to develop resonating business requirements and how they support and enable the enterprise to achieve its business objectives.

Reactions from other readers: A quality hard copy of the TOGAF method is easier to read than endless HTML docs or huge PDFs. The TOGAF framework has become the de facto standard for developing Enterprise Architectures. A good one-stop shop guide and toolsets for getting your Enterprise Architecture right. A lot of thought, experience, and funding have gone into this, and the results are well worth the price you pay for the book and the actual accreditation should you or your organization wish to go down that route.

The TOGAF® Standard, 10th Edition - Architecture Development Method - 2025 Update The Open Group, 2025-06-30

This document is a compilation of three documents within the TOGAF Standard. It has been developed and

approved by The Open Group and is part of the TOGAF Standard 10th Edition The three documents in this set are The TOGAF Standard Architecture Development Method This document describes the TOGAF Architecture Development Method ADM an iterative approach to developing an Enterprise Architecture The TOGAF Standard ADM Techniques This document contains a collection of techniques available for use in applying the TOGAF approach and the TOGAF ADM The TOGAF Standard Applying the ADM This document contains guidelines for adapting the TOGAF ADM to address the specific style of architecture required in a practical context The TOGAF Standard is intended for Enterprise Architects Business Architects IT Architects Data Architects Systems Architects Solution Architects and anyone responsible for the architecture function within an organization **Annals of Entrepreneurship Education and Pedagogy - 2025** Susana C. Transformative Management Education Ulrike Landfester, Jörg Metelmann, 2018-12-07 Due to the recent global financial crises academic business schools have come in for much criticism having in the eyes of the public failed in their responsibility to society by teaching future managers only how to increase their personal gain without any consideration as to their actions social and cultural consequences Realising that there is a pressing need to innovate their educational offers accordingly business schools are beginning to turn to the humanities and social sciences to improve on the understanding and thus the teaching of management This book is the result of an empirical study conducted at eight academic business schools that either already practise or are beginning to practise linking management education to the humanities and social sciences Gathered mostly in interviews our research team conducted during site visits to these schools the material presented shows three major fields of concern how to shift the focus from instrumental to transformative learning how to reframe the concept of disciplinary subject matter towards a more relational understanding of knowledge especially in the light of the impact digitalisation is having on education and how to address the organisational as well as the political consequences of management education turning towards the inclusion of the humanities and social sciences strategically The findings indicate that the humanities and social sciences indeed offer knowledge which can significantly help management education with meeting the challenges of the twenty first century Innovating management education by making it part of its program portfolios proves a challenge in and of itself in the face of a university system which still determinedly clings to disciplinary segregation Reforming management education towards an engagement with fields of

knowledge traditionally at best ignored and at worst vilified as being completely useless in the real world may therefore place academic business schools at the forefront of a movement that is beginning to reshape the educational landscape as a whole This book will be of value to researchers academics and students in the fields of business management studies organisational studies and education studies
