Phonics Practice Media Sensation:

Making Sense of Mass Education Gordon Tait, 2013 *Making Sense of Mass Education* provides a comprehensive analysis of the field of mass education. The book presents new assessment of traditional issues associated with education: class, race, gender, discrimination, and equity. It dispels myths and assumptions about the classroom. It examines the complex relationship between the media, popular culture, and schooling, and places the expectations surrounding the modern teacher within ethical, legal, and historical contexts. The book blurs some of the disciplinary boundaries within the field of education, drawing upon sociology, cultural studies, history, philosophy, ethics, and jurisprudence to provide stronger analyses. The book reframes the sociology of education as a complex mosaic of cultural practices, forces, and innovations. Engaging and contemporary, it is an invaluable resource for teacher education, students, and anyone interested in a better understanding of mass education.

Making Sense Bill Cope, Mary Kalantzis, 2020-01-30 Explains the multimodal connections of text, image, space, body, sound, and speech in both old and new computer-mediated communication systems. *Sense-making: Problematizing Constructs of Literacy for 21st Century Education* Marilyn J. Narey, Kelli Jo Kerry-Moran, 2021-03-15 This book is a rich yet highly accessible volume that details an exciting and much-needed inquiry into the notion of literacy: what it is, why it is, and how it might be framed most effectively for 21st-century education. The chapters unfold in a creative interplay of practice and theory. Narey's insightful questioning into the socio-historical-cultural implications of literacy as empowerment establishes the critical context, while Kerry-Moran's examination of the burgeoning literacy landscape reveals challenges for teacher education. Drawing upon classic and cutting-edge theories, Narey builds a provocative and powerful case for a 21st-century construct of literacy as sense-making, sense as relative to the senses, i.e., sight, hearing, and sense as making meaning. Her innovative model of the literacy event opens up a range of potential foci for analysis and facilitates her teasing out of two critical areas for instruction: sensory perception and aesthetic knowledge. This theoretical sense-making lens is applied to Kerry-Moran's teacher education classroom as the authors reflect upon further development. As a timely, original, and thought-provoking work, this slim volume of big ideas promises to be a valuable resource for teacher educators and other scholars who seek a clear and cohesive frame for literacy in 21st-century education. This is a very well-written scholarly text that provides a new and important theory of 21st-century literacy. Narey's sketches of literacy as sense-making are laid out in logical form, building upon researched and referenced sources to ground her ideas and offering the reader information, examples, and new insights. In addition to providing many significant perspectives underpinning her new theory, Narey provides excellent historical and current explanations about literacy from highly respected researchers in the field. The inclusion of a practical application of Narey's conceptual-theoretical framework to Kerry-Moran's example of an instructional unit in a teacher education course is helpful to understanding the theory in practice. The references throughout the work are extensive, comprehensive, and very well documented. This text, *Sense-making: Problematizing Constructs of Literacy for 21st*
