Mathematical Problems in Meteorological Modelling András Bátkai, Petra Csomós, István Faragó, András Horányi, Gabriella Szépszó, 2016-11-08 This book deals with mathematical problems arising in the context of meteorological modelling It gathers and presents some of the most interesting and important issues from the interaction of mathematics and meteorology It is unique in that it features contributions on topics like data assimilation ensemble prediction numerical methods and transport modelling from both mathematical and meteorological perspectives The derivation and solution of all kinds of numerical prediction models require the application of results from various mathematical fields The present volume is divided into three parts moving from mathematical and numerical problems through air quality modelling to advanced applications in data assimilation and probabilistic forecasting The book arose from the workshop Mathematical Problems in Meteorological Modelling held in Budapest in May 2014 and organized by the ECMI Special Interest Group on Numerical Weather Prediction Its main objective is to highlight the beauty of the development fields discussed to demonstrate their mathematical complexity and more importantly to encourage mathematicians to contribute to the further success of such

practical applications as weather forecasting and climate change projections Written by leading experts in the field the book provides an attractive and diverse introduction to areas in which mathematicians and modellers from the meteorological community can cooperate and help each other solve the problems that operational weather centres face now and in the near future Readers engaged in meteorological research will become more familiar with the corresponding mathematical background while mathematicians working in numerical analysis partial differential equations or stochastic analysis will be introduced to further application fields of their research area and will find stimulation and motivation for their future research work

Languages and Compilers for Parallel Computing Samuel P. Midkiff, Jose E. Moreira, Manish Gupta, Siddhartha Chatterjee, Jeanne Ferrante, Jan Prins, William Pugh, Chau-Wen Tseng, 2003-06-29 This volume contains the papers presented at the 13th International Workshop on Languages and Compilers for Parallel Computing It also contains extended abstracts of submissions that were accepted as posters The workshop was held at the IBM T J Watson Research Center in Yorktown Heights New York As in previous years the workshop focused on issues in optimizing compilers languages and software environments for high performance computing This continues a trend in which languages compilers and software environments for high performance computing and not strictly parallel computing has been the organizing topic As in past years participants came from Asia North America and Europe This workshop reflected the work of many people In particular the members of the steering committee David Padua Alex Nicolau Utpal Banerjee and David Gelernter have been instrumental in maintaining the focus and quality of the workshop since it was first held in 1988 in Urbana Champaign The assistance of the other members of the program committee Larry Carter Sid Chatterjee Jeanne Ferrante Jan Prins Bill Pugh and Chau wen Tseng was crucial The infrastructure at the IBM T J Watson Research Center provided trouble free logistical support The IBM T J Watson Research Center also provided financial support by underwriting much of the expense of the workshop Appreciation must also be extended to Marc Snir and Pratap Pattnaik of the IBM T J Watson Research Center for their support

The Annals of Mathematical Statistics, 1964 **Normal Impingement of a Supersonic Jet on a Plane** Kuei-Yuan Chien, 1975 The problem of a balanced planar or axisymmetric supersonic jet impinging normally on a flat surface has been considered based on an inviscid theory The object of the study was to provide a rational model for calculating shock interference heating as produced by a type IV shock interaction pattern The unwanted singularity at a low supersonic Mach number peculiar to scheme I of the one strip formulation of the method of integral relations as observed by South and by Gummer and Hunt was successfully removed by the application of the scheme III of the one strip formulation of the method of integral relations The resulting simultaneous nonlinear algebraic equations were easily solved iteratively by the Newton Raphson method Sensitivity of the solution on various approximating functions

employed was extensively investigated Unlike the findings reported by Gummer and Hunt solutions that satisfy all well posed boundary conditions can be obtained by the one strip formulation Results indicate that for the planar case a rational engineering solution for the stagnation point velocity gradient and hence the peak heat transfer rate has been obtained For the axisymmetric case however solutions appear to be not quite converging A two strip formulation based on the method of integral relations is also included

High-Speed Precision CNC Machine Tools Chi Ma,Jialan Liu,2025-09-01 High Speed Precision CNC Machine Tools The Theory and Methods of Thermal Behavior Simulation and Control summarizes the thermal structure interaction simulation and optimization of high speed precision machine tools It begins by examining the current research status of high speed precision machine tools followed by the thermal structure interaction characteristic modeling and simulation of high speed precision machine tools Later chapters are related to the application of the topology optimization method and axial rotating heat pipe in high speed precision machine tools Provides an important boundary condition for modelling the thermal structure interaction characteristics of high speed precision CNC machine tools Covers the systematic modeling method for thermal structure interaction characteristics of high speed precision CNC machine tools Includes detailed coverage of the application of axial rotating heat pipe in high speed precision machine tool thermal error control
