Analysis of Total Productive Maintenance José Roberto Díaz-Reza, Jorge Luis García-Alcaraz, Valeria

Martínez-Loya, 2018-10-01 This book presents the state of the art in Total Productive Maintenance (TPM) and its benefits. The authors present a survey applied to 368 manufacturing industries in order to determine their level of execution of TPM. Then a series of causal models are presented. For each model the authors present a measure of the dependency between the critical success factors and the benefits obtained, allowing industry managers to differentiate between essential and non-essential activities. The content also allows students and academics to obtain a theoretical and empirical basis on the importance of TPM as a lean manufacturing tool in the context of industry 4.0.
