Cohen,2013-03-09 As you read this you are probably unaware of how your left foot feels in your shoe Although your brain was receiving sensory input from this foot you were not aware of your foot because you were reading and not attending to it However this discussion led you to move your attention to your left foot and to become aware of it When I was a medical student I saw a patient who was unaware of both the left side of his body and the left side of his environment Unlike people in normal health who when instructed can become aware of the left side of the body this patient could not be made aware of his left arm or the left side of his environment The patient s defect was so profound that despite being hungry he was unaware of food on the left side of his tray and did not recognize that his left arm belonged to him This left sided body and spatial unawareness could not be accounted for by a primary sensory defect Although I knew that this man suffered from a large right hemisphere stroke I did not know the brain mechanisms that accounted for this profound example of unawareness It was not until I had almost completed my neurology training in 1969 that I was able to return to this problem At that time most neuropsychological research was directed at understanding the language disorders associated with brain disease *Motor Sport* William Boddy,1969 **The Official Railway Guide** ,1888 **Hindustani Classical Music** Soubhik Chakraborty,Swarima Tewari,Arshi Rahman,Maria Jamal,Apra Lipi,Apoorva Chakraborty,Apoorva Nanda,Pranjala Shukla,2021-12-01 This work aims to address the historical development of the great Indian raga tradition enhanced by computational approaches and to use computational strategies to analyze aspects of contemporary Hindustani classical music HCM It is divided into two parts with Part 1 focusing on the history and aesthetics of HCM and Part 2 covering its computational aspects The historical development of HCM in the ancient medieval and modern periods its terms and genre and its Khayal gharanas are covered in Part 1 The subtopics include essential concepts such as raga tala shruti thaata gharana khayal dhrupad thumri tappa etc Part 2 covers the state of the art in computational musicology raga analysis and song analysis using statistics The subtopics include statistical modeling inter onset interval note duration analysis pitch movement between the notes rate of change of pitch pitch velocity and probabilistic analysis of musical notes The author concludes the work with reflecting on the lives of a few renowned musicians and musicologists with an account of hilarious moments taken from their lives to excite the reader to know more about HCM This book would be useful for musicians musicologists researchers in music history aesthetics computational musicology and advanced undergraduate and postgraduate students of music and musicology **Spectroscopy, Dynamics And Molecular Theory Of Carbon Plasmas And Vapors: Advances In The Understanding Of The Most Complex High-temperature**

Elemental System Laszlo Nemes,Stephan Irle,2011-06-17 This book is a stop gap contribution to the science and technology of carbon plasmas and carbon vapors It strives to cover two strongly related fields the molecular quantum theory of carbon plasmas and carbon nanostructures and the molecular and atomic spectroscopy of such plasmas and vapors These two fields of research are strongly intertwined and thus reinforce one another Even though the use of carbon nanostructures is increasing by the day and their practical uses are emerging there is no modern review on carbon plasmas especially from molecular theoretical and spectroscopic viewpoints The importance of the present book is therefore great from both educational and practical aspects This review might be the first step towards bringing such textbooks into existence for university education Similarly for applied and engineering works in carbon nanostructures the book provides a theoretical salient point for technologists in the field **Recent Advances and Challenges on Big Data Analysis in Neuroimaging**
