Inkbound Realms: Traversing the Landscapes of English Literature 2025

ANINDRA KUMAR BISWAS, DR. APARAJITA SHUKLA, DR NEELAM SHUKLA, DR. REVANT GAUTAM, PREFACE Literature has always been one of humanity's most enduring ways of making sense of the world From the rhythm of ancient oral storytelling to the fluid prose of contemporary novels the written word carries with it the weight of history memory and imagination Inkbound Realms Traversing the Landscapes of English Literature was conceived as an attempt to bring these diverse voices together in one journey illuminating the traditions transformations and tensions that have shaped English literature across the centuries This book is not meant to be an encyclopaedic record nor a rigid survey of authors and dates Instead it aims to capture the living spirit of literature the way it reflects the concerns of its age while also transcending them Each chapter is crafted to situate texts within their cultural and historical contexts while offering readers concrete examples and case studies that bring the material to life Whether one encounters Chaucer's humour Shakespeare's depth Dickens's social vision or Woolf's experimental prose the intention is to show how these works remain relevant today The work is also guided by an inclusive spirit English literature is no longer the sole property of Britain it is a global phenomenon shaped by writers from Asia Africa the Americas and beyond This book embraces that plurality tracing how English has become a shared language of storytelling capable of expressing local identities while also speaking to universal human experiences I hope that students will find in these chapters a helpful companion to their studies that scholars will appreciate the synthesis of tradition and contemporary insight and that general readers will discover or rediscover the joy of reading across ages and genres More than anything my aspiration is that this book encourages readers to see literature not as a closed canon but as a set of open landscapes realms bound in ink yet constantly expanding through new voices technologies and cultural encounters As you embark on this journey through the inkbound realms may you not only gain knowledge of English literature but also a renewed sense of its beauty power and capacity to connect us across time and place Authors Anindra Kumar Biswas Dr Aparajita Shukla Dr Neelam Shukla Dr Revant Gautam *Cli-Fi and Class* Debra J.

Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the

dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. *Climate Fiction and Class* focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological, addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film *Black Panther* and the Broadway musical *Hadestown*, this collection unpacks the complex ways economic exploitation impacts planetary well-being and the ways climatic change shapes those inequities in turn.

Understanding Public Debates Jens Martin Gurr, 2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts, literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today, whether on different conceptions of liberty, identity, politics, historical commemoration, challenges of globalization or responses to climate change. *Understanding Public Debates* presents case studies including Milton's *Paradise Lost*, P. B. Shelley's 1820 Reform essay, Philip Roth's *The Human Stain*, the songwriting of Neil Young and Edward Young's 1720s *Sea Odes*, recent climate fiction, as well as non-literary conflict narratives. Rather than mining texts for arguments for or against certain positions, this book is interested in how texts stage these debates by means of multiple perspectives, narrative situations or ambiguities. By suggesting how educators might use literary texts as conversation starters for more rational debates, the volume also contributes to Public Literary Studies. Three important fields are here brought together: 1. the study of societal debates and conflicts and the ways in which they challenge pluralist societies; 2. explorations of the societal functions of literature and of non-literary narratives; and 3. discussions of the role and functions of literary studies. The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates.

Interdisciplinary in scope, the volume showcases the many ways in which literary and legal methods and insights both converge and remain distinct.

The Anthropocene Working Group and the Global Debate Around a New Geological Epoch Martin Bohle, Boris Holzer, Leslie Sklair, Fabienne Will, 2025-03-03 This book examines the role of the Anthropocene Working Group (AWG) in public and scholarly discussions of the meaning of the Anthropocene proposal. The status of the Anthropocene, both as a geoscientific concept and as a cultural concept becoming increasingly familiar in the public sphere, has been highly controversial. While geoscientists focus on possible geological markers and periodisation, the social sciences, environmental humanities and creative arts have taken up the Anthropocene as a cultural concept to make sense of the planetary environmental crisis and contemporary society. This book documents intra-, inter- and transdisciplinary debates, particularly although not limited to how different scholarly disciplines have responded to the Anthropocene proposal. The authors analyse

how the AWG has become the focal point of a debate that straddles the boundaries between academic disciplines and public perceptions of science The AWG thus serves as a case of the globalisation of science in terms of the global interconnectedness of scientific disciplines and the cultural significance of the Anthropocene proposal
