Martin A. Nowak

Supercooperators:

SuperCooperators Martin Nowak, Roger Highfield, 2011-03-22 EVOLUTION IS OFTEN PRESENTED AS A STRICTLY COMPETITIVE ENDEAVOR This point of view has had serious implications for the way we see the mechanics of both science and culture But scientists have long wondered how societies could have evolved without some measure of cooperation And if there was cooperation involved how could it have arisen from nature red in tooth and claw Martin Nowak one of the world's experts on evolution and game theory working here with bestselling science writer Roger Highfield turns an important aspect of evolutionary theory on its head to explain why cooperation not competition has always been the key to the evolution of complexity He offers a new explanation for the origin of life and a new theory for the origins of language biology's second greatest information revolution after the emergence of genes SuperCooperators also brings to light his game changing work on disease Cancer is fundamentally a failure of the body's cells to cooperate Nowak has discovered but organs are cleverly designed to foster cooperation and he explains how this new understanding can be used in novel cancer treatments Nowak and Highfield examine the phenomena of reciprocity reputation and reward explaining how selfless behavior arises naturally from competition how forgiveness generosity and kindness have a mathematical rationale how companies can be better designed to promote cooperation and how there is remarkable overlap between the recipe for cooperation that arises from quantitative analysis and the codes of conduct seen in major religions such as the Golden Rule In his first book written for a wide audience this hugely influential scientist explains his cutting edge research into the mysteries of cooperation from the rise of multicellular life to Good Samaritans With wit and clarity Nowak and Highfield make the case that cooperation not competition is the defining human trait SuperCooperators will expand our understanding of evolution and provoke debate for years to come

SuperCooperators Martin Nowak, Roger Highfield, 2011-03-17 Beyond The Survival of the Fittest Why Cooperation not Competition is the Key to Life If life is about survival of the fittest then why would we risk our own life to jump into a river to save a stranger Some people argue that issues such as charity fairness forgiveness and cooperation are evolutionary loose ends side issues that are of little consequence But as Harvard's celebrated evolutionary biologist Martin Nowak explains in this groundbreaking and controversial book cooperation is central to the four billion year old puzzle of life Indeed it is cooperation not competition that is the defining human trait

Supercooperators Martin A. Nowak, 2012 *Super Cooperators* Martin A. Nowak, Roger

Highfield,2011 Everyone is familiar with Darwin's revolutionary idea about the survival of the fittest and most people agree that it works but Darwin's famous theory has one major chink If life is about survival of the fittest then why would we risk our own life to jump into a river to save a stranger Some people argue that issues such as charity fairness forgiveness and cooperation are evolutionary loose ends side issues that are of little consequence But as Harvard's celebrated evolutionary biologist Martin Nowak explains in this ground breaking book cooperation is central to the four billion year old puzzle of life Cooperation is fundamental to how molecules in the primordial soup crossed the watershed that separates dead chemistry from biochemistry Cooperation is the key to understanding why language evolved an event that is as significant as the evolution of the first primitive organism The book also brings to light Nowak's game changing work on disease Cancer is fundamentally a failure of the body's cells to cooperate but organs are cleverly designed to foster cooperation and as Nowak explains this new understanding can be used in novel cancer treatments In his first book for a wide audience this hugely influential scientist explains his cutting edge research into the mysteries of cooperation from the rise of multicellular life to Good Samaritans With wit and clarity Martin Nowak and the bestselling science writer Roger Highfield make the case that cooperation not competition is the defining human trait Publisher's description [Science](#) ,2011 **Polityka** ,2012 □□□ □□ ,2012 [Law and Economics](#) Eric A. Posner,2001 The book is divided into two parts The first contains more traditional law and economics articles covering a range of conventional legal topics This part it is hoped will give the novice a flavour of the state of the field and the traditional methods of analysis The second part attempts to introduce new methodological techniques and subject matter concerns to law and economics *California Management Review* ,2011
