

I am answering to @deepu_p2006 query.

When you update esxi patch using below command, usually it will update ESXi build but keeps previous image profile name. Just add prefix "{Updated}" as shown in attached file "1.jpg"

```
esxcli software vib update -d /vmfs/volumes/datastore1/VMware-ESXi-7.0U3i-20842708-depot.zip
```

If you want that image profile will also be same as the build are trying to update. You should use below commands and update esxi image profile which will also update the build as well.

Procedure of updating ESXi using Image Profile:

```
login as: root
Keyboard-interactive authentication prompts from server:
| Password:
End of keyboard-interactive prompts from server
The time and date of this login have been sent to the system logs.
```

WARNING:

All commands run on the ESXi shell are logged and may be included in support bundles. Do not provide passwords directly on the command line. Most tools can prompt for secrets or accept them from standard input.

VMware offers supported, powerful system administration tools. Please see www.vmware.com/go/sysadmintools for details.

The ESXi Shell can be disabled by an administrative user. See the vSphere Security documentation for more information.

```
