Zadeh, Jacek M. Zurada, 2010-06-20 This volume constitutes the proceedings of the 10th International Conference on Artificial Intelligence and Soft Computing ICAISC 2010 held in Zakopane Poland in June 13 17 2010 The articles are organized in topical sections on Fuzzy Systems and Their Applications Data Mining Classification and Forecasting Image and Speech Analysis Bioinformatics and Medical Applications Volume 6113 together with Neural Networks and Their Applications Evolutionary Algorithms and Their Applications Agent System Robotics and Control Various Problems of Artificial Intelligence Volume 6114      Biomedical Engineering Systems and Technologies Ana Fred, Joaquim Filipe, Hugo Gamboa, 2008-11-27 This book contains the best papers of the First International Joint Conference on Biomedical Engineering Systems and Technologies BIOSTEC 2008 organized by the Institute for Systems and Technologies of Information Control and Communication INSTICC technically co sponsored by the IEEE Engineering in Medicine and Biology Society EMB ACM SIGART and the Workflow Management Coalition WfMC in cooperation with AAAI The purpose of the International Joint Conference on Biomedical Engineering Systems and Technologies is to bring together researchers and practitioners including engineers biologists health professionals and informatics computer scientists interested in both theoretical advances and applications of information systems artificial intelligence signal processing electronics and other engineering tools in knowledge areas related to biology and medicine BIOSTEC is composed of three co located conferences each specializes in one of the aforementioned main knowledge areas namely BIODEVICES International Conference on Biomedical Electronics and Devices focuses on aspects related to electronics and mechanical engineering specially equipment and materials inspired from biological systems and addressing biological requirements Monitoring devices instrumentation sensors and systems biorobotics micro nanotechnologies and biomaterials are some of the technologies addressed at this conference      **Rough Sets, Fuzzy Sets, Data Mining and Granular Computing** Aijun An, Jerzy Stefanowski, Sheela Ramanna, Cory Butz, Witold Pedrycz, 2007-08-22 This book constitutes the refereed proceedings of the 11th International Conference on Rough Sets Fuzzy Sets Data Mining and Granular Computing RSFDGrC 2007 held in Toronto Canada in May 2007 in conjunction with the Second International Conference on Rough Sets and Knowledge Technology RSKT 2007 both as part of the Joint Rough Set Symposium JRS 2007      *Data Mining and Knowledge Discovery via Logic-Based Methods* Evangelos Triantaphyllou, 2010-06-08 The importance of having efficient and

effective methods for data mining and knowledge discovery DM KD to which the present book is devoted grows every day and numerous such methods have been developed in recent decades There exists a great variety of different settings for the main problem studied by data mining and knowledge discovery and it seems that a very popular one is formulated in terms of binary attributes In this setting states of nature of the application area under consideration are described by Boolean vectors defined on some attributes That is by data points defined in the Boolean space of the attributes It is postulated that there exists a partition of this space into two classes which should be inferred as patterns on the attributes when only several data points are known the so called positive and negative training examples The main problem in DM KD is defined as finding rules for recognizing classifying new data points of unknown class i.e. deciding which of them are positive and which are negative In other words to infer the binary value of one more attribute called the goal or class attribute To solve this problem some methods have been suggested which construct a Boolean function separating the two given sets of positive and negative training data points

**Digital Signal Processing with Kernel Methods** Jose Luis Rojo-Alvarez, Manel Martinez-Ramon, Jordi Munoz-Mari, Gustau Camps-Valls, 2018-02-05 A realistic and comprehensive review of joint approaches to machine learning and signal processing algorithms with application to communications multimedia and biomedical engineering systems Digital Signal Processing with Kernel Methods reviews the milestones in the mixing of classical digital signal processing models and advanced kernel machines statistical learning tools It explains the fundamental concepts from both fields of machine learning and signal processing so that readers can quickly get up to speed in order to begin developing the concepts and application software in their own research Digital Signal Processing with Kernel Methods provides a comprehensive overview of kernel methods in signal processing without restriction to any application field It also offers example applications and detailed benchmarking experiments with real and synthetic datasets throughout Readers can find further worked examples with Matlab source code on a website developed by the authors <http://github.com/DSPKM> Presents the necessary basic ideas from both digital signal processing and machine learning concepts Reviews the state of the art in SVM algorithms for classification and detection problems in the context of signal processing Surveys advances in kernel signal processing beyond SVM algorithms to present other highly relevant kernel methods for digital signal processing An excellent book for signal processing researchers and practitioners Digital Signal Processing with Kernel Methods will also appeal to those involved in machine learning and pattern recognition
