Surface Architecture:

Surface Architecture David Leatherbarrow, Mohsen Mostafavi, 2005-02-11 A study of the building surface architecture's primary instrument of identity and engagement with its surroundings. Visually many contemporary buildings either reflect their systems of production or recollect earlier styles and motifs. This division between production and representation is in some ways an extension of that between modernity and tradition. In this book David Leatherbarrow and Mohsen Mostafavi explore ways that design can take advantage of production methods such that architecture is neither independent of nor dominated by technology. Leatherbarrow and Mostafavi begin with the theoretical and practical isolation of the building surface as the subject of architectural design. The autonomy of the surface, the free facade, presumes a distinction between the structural and nonstructural elements of the building between the frame and the cladding. Once the skin of the building became independent of its structure, it could just as well hang like a curtain or like clothing. The focus of the relationship between structure and skin is the architectural surface. In tracing the handling of this surface, the authors examine both contemporary buildings and those of the recent past. Architects discussed include Albert Kahn, Ludwig Mies van der Rohe, Alison and Peter Smithson, Alejandro de la Sota, Robert Venturi, Jacques Herzog and Pierre de Meuron. The properties of a building's surface, whether it is made of concrete, metal, glass, or other materials, are not merely superficial; they construct the spatial effects by which architecture communicates. Through its surfaces, a building declares both its autonomy and its participation in its surroundings.

Surface Architecture David Leatherbarrow, Mohsen Mostafavi, 2002 A study of the building surface architecture's primary instrument of identity and engagement with its surroundings. *Kissing Architecture* Sylvia Lavin, 2011-05-09 Architecture's growing intimacy with new types of art. *Kissing Architecture* explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of kissing to describe the growing intimacy between architecture and new types of art, particularly multimedia installations that take place in and on the surfaces of buildings and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. *Kissing Architecture* is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, *Kissing Architecture* is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing and experiencing architecture in the age after representation.

Weimar Surfaces Janet Ward, 2001-04-04 Germany of the 1920s offers a stunning moment in modernity a time when surface values first became determinants of taste activity and occupation modernity was still modern spectacle was still spectacular Janet Ward's luminous study revisits Weimar Germany via the lens of metropolitan visual culture analyzing the power that 1920s Germany holds for today's visual codes of consumerism *Towards a Critique of Architecture's Contemporaneity* Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture's contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper's theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper's differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture's self representation Even though the title of this book recalls the Semperian Four Elements of Architecture its argument encapsulates a unique historico theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book's contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper's theorization of architecture in contradistinction to the ways in which technology's mediation has dominated architecture's representation Burrowing through the invisible tie between technique and work asymptomatic of architecture's predicament in global capitalism *Towards a Critique of Architecture's Contemporaneity* advances the scope of architectural criticism beyond the exhausted formalism and architecture's turn to philosophy circa the 1980s and the present tendencies for presentism It will therefore be of interest to researchers and students of architectural history and theory **Emerging Nanotechnologies in Dentistry** Karthikeyan Subramani, Waqar Ahmed, 2011-11-22 Nanotechnology and the future of Dentistry Nanoparticles for Dental Materials Synthesis analysis and Applications Antimicrobial nanoparticles in Restorative Composites Nanotechnology in operative dentistry a perspective approach of history mechanical behavior and clinical application Nanotechnology and dental implants Titanium surface modification techniques for dental implants From microscale to nanoscale Titanium nanotubes as carriers of osteogenic growth factors and antibacterial drugs for applications in dental implantology Cellular responses to nanoscale surface modifications of titanium implants for dentistry and bone tissue engineering applications Corrosion Resistance of Ti6Al4V with Nanostructured TiO₂ Coatings Multiwalled Carbon Nanotubes Hydroxyapatite Nanoparticles incorporated GTR membranes Fabrication of PEG hydrogel micropatterns by Soft photolithography and PEG hydrogel as Guided Bone Regeneration membrane in dental implantology Na *Architecture in the Baltic States* Marco Falsetti, 2025-11-20 This book explores the architecture of the Baltic States a region still relatively unexplored in

[The Baroque in Architectural Culture, 1880-1980](#) Andrew Leach,John Macarthur,2016-03-09 In his landmark volume Space Time and Architecture Sigfried Giedion paired images of two iconic spirals Tatlin s Monument to the Third International and Borromini s dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely

acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture
