

Test Strategy	Test Plan
A Test strategy is a high-level document that defines an approach on how to test and approach testing at the organizational level.	A Test Plan is a granular level document defining what, how, and when to test the project level.
A test strategy sits on top of the test plan and the test plan takes clues from the test strategy on how testing will take place.	Intend is to write down all possible end-user flows. They are mapped and traceable to test scenarios.
An organization would have only one test strategy defining the overall organizational approach towards testing and test strategy would not change.	Whereas an organization could have multiple test plans customized as per the project requirement which can change and updated with time. A project can also have more than one test plan depending on the requirement. For e.g., a project could have a test plan to govern overall testing and an automation test plan for automation testing.
