The Chaco Meridian Centers Of Political Power In The Ancient Southwest:

The Chaco Meridian Stephen H. Lekson, 1999 Describes ruins and their political and economic meaning *The Bioarchaeology of Social Control* Ryan P. Harrod, 2017-09-20 Taking a bioarchaeological approach this book examines the Ancestral Pueblo culture living in the Four Corners region of the United States during the late Pueblo I through the end of the Pueblo III period AD 850 1300 During this time a vast system of pueblo villages spread throughout the region creating what has been called the Chaco Phenomenon named after the large great houses in Chaco Canyon that are thought to have been centers of control Through a bioarchaeological analysis of the human skeletal remains this volume provides evidence that key individuals within the hierarchical social structure used a variety of methods of social control including structural violence to maintain their power over the interconnected communities *An Archaeology of the Cosmos* Timothy R. Pauketat, 2013 An Archaeology of the Cosmos seeks answers to two fundamental questions of humanity and human history The first question concerns that which some use as a defining element of humanity religious beliefs Why do so many people believe in supreme beings and holy spirits The second question concerns changes in those beliefs What causes beliefs to change Using archaeological evidence gathered from ancient America especially case material from the Great Plains and the pre Columbian American Indian city of Cahokia Timothy Pauketat explores the logical consequences of these two fundamental questions Religious beliefs are not more resilient than other aspects of culture and society and people are not the only causes of historical change An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people places and things were bundled together and positioned in ways that constituted the fields of human experience This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past [The Oxford Handbook of Light in Archaeology](#) Costas Papadopoulos, Holley Moyes, 2021-12-09 The first volume of its kind to address the impact and influence of light in different facets of archaeology from myth and ritual to houses and museum exhibitions Combines theory and methodology from archaeology anthropology architecture urban design art philology and computer science Arranged in a thematic structure based on uses of light in different spatial contexts to allow quick reference to specific aspects of light in archaeology Richly illustrated throughout Book jacket **Making Ancient Cities** Andrew Creekmore, Kevin D. Fisher, 2014-04-28 Investigates how the structure and use of space developed and changed in cities and examines the role of different societal groups in shaping urbanism [The Historical Turn in Southeastern Archaeology](#) Robbie Ethridge, Eric E. Bowne, 2020-11-03 This volume uses case studies to capture the recent emphasis on history in archaeological reconstructions of America s deep past representing a profound shift in thinking about precolonial and colonial history and helping to erase the false divide between ancient and contemporary America *Flower World - Mundo Florido* Mark Howell, Matthias Stockli, Arnd Adje Both, 2014-12-31 The bilingual series Flower World Music Archaeology of the Americas raises the study of

ancient music and music related activities of the pre Columbian Americas to the next level For the first time in the history of science a series offering anthologies featuring scientific investigations in this fascinating multidisciplinary field is available The series encompasses peer reviewed studies by renowned scholars on both past and living music traditions from South Central and North America and thus constitute a platform for the most up to date information on the music archaeology of the continent It features case studies and the results of research projects in the field in which a great variety of music archaeological approaches such as conventional archaeology for the interpretation of the find contexts experimental archaeology for reconstructive instrument making and playing ethnohistory and ethnolinguistics for the interpretation of textual sources music iconology for the interpretation of visual sources organology and acoustics and ethnomusicology for the research on contemporary legacies for the study of the instrument finds are commonly applied The title of the series Flower World refers to a mythological even sacred place filled with the sweet scent of flowers bird calls pleasant sounds and dance It is a place full of happiness and joy even if it belongs to the realm of the Dead which sustains the enduring renewal of life on earth

Archaeology and The Politics of Vision in a Post-Modern Context Vítor Oliveira Jorge, Julian

Tomas, 2009-01-14 Archaeology is intimately connected to the modern regime of vision A concern with optics was fundamental to the Scientific Revolution and informed the moral theories of the Enlightenment And from its inception archaeology was concerned with practices of depiction and classification that were profoundly scopic in character Drawing on both the visual arts and the depictive practices of the sciences employing conventionalised forms of illustration photography and spatial technologies archaeology presents a paradigm of visualised knowledge However a number of thinkers from Jean Paul Sartre onwards have cautioned that vision presents at once a partial and a politicised way of apprehending the world In this volume authors from archaeology and other disciplines address the problems that face the study of the past in an era in which realist modes of representation and the philosophies in which they are grounded in are increasingly open to question

Modes of Production and Archaeology Robert M. Rosenswig, Jeremy J.

Cunningham, 2017-05-15 This volume challenges the historical materialistic non capitalist modes that are used by archaeologists as not all that useful and instead considers how social labor is organized to transform nature into culturally refined and useful resources and how this can either maintain or change a culture Rather than describe what a society is using the theoretical framework of Marx and materialism a mode of production approach explores what a society does in a more dynamic sense
