The Clinical Practice Of Educational Therapy A Teaching Model:

The Clinical Practice of Educational Therapy Maxine Ficksman, Jane Uteley Adelizzi, 2013-05-13 The Clinical Practice of Educational Therapy is the first book to provide a comprehensive review of the interdisciplinary profession and practice of educational therapy as it exists today. It describes the scope and practice of educational therapy from its European roots to its growing presence in the United States and provides case studies to illustrate the work of educational therapists. Key Features: Interdisciplinary Perspective. Other books focus on either educational or therapeutic interventions but rarely discuss the blend and synergy of disciplines that are the hallmark of the profession. Illustrative Cases. The text draws heavily on case studies as a means of understanding the practice of educational therapy, especially the relationship between therapist and client. Expertise. Chapter authors are either experienced educational therapists or allied professionals who have made scholarly contributions to the profession, such as Dorothy Ungerleider, Patricia Waters, Roslyn Arnold, and George McCloskey. In addition to educational therapy students and practitioners, this book is appropriate for those working in related fields including special education, school psychology, school counseling, and social work in educational settings. *The Clinical Practice of Educational Therapy* Maxine Ficksman, Jane Uteley Adelizzi, 2010. Educational Therapy in Action Dorothy Fink

Ungerleider, 2011-08-15 This book provides an in depth look at what a little known clinician the educational therapist does and how they do it It goes behind the clinician s door to illustrate the unusual and broad range of interventions both academic vocational and social emotional that an educational therapist employs This particular case study involves a young woman named Nora who had a severe but undiagnosed auditory processing disorder She could not give meaning to the spoken language that came at her too rapidly leaving her in a constant fog of words that she couldn t comprehend This case discloses the problems their causes and the emotional toll that had to be considered when developing an effective educational therapeutic plan for Nora It vividly illustrates the dynamic exchanges and mutual learning that goes on between client and therapist Parts I and II illustrate how the psycho educational interventions that addressed Nora s academic and non academic needs were gradually formulated over the first year Part III provides a series of vignettes from subsequent years that illustrate the ongoing applications of the therapist s work Distinguishing Features Explanatory Sidebars The rationale behind particular techniques and interventions is clarified through a system of explanatory sidebars that inform the reader without distracting from the story This approach makes the book both an instructional tool well as compelling story Organic Curriculum The rationale for and application of an organic personalized curriculum is explained and applied throughout the book as a model for others to use in working with this population A Longitudinal Perspective The initial work with Nora began many years ago so this book provides a long view of her life and tracks the influences that educational therapy exerted on her development into a fully functioning adult Cognitive Emotional Integration The core of educational therapy the interdependence of cognitive skills and emotional response is clearly documented throughout the book In addition to educational therapy students and practitioners this book is appropriate for those working in related fields such as special education school psychology school counselling and social work in educational settings
