The Cold War A Military History:

The Cold War Robert Cowley, 2005 Essays by twenty five distinguished historians shed new light on the military and political aspects of the Cold War discussing such topics as the Cuban Missile Crisis the Vietnam War espionage and the arms race with the Soviets

The Cold War David Miller, 2012-05-31 From 1949 to 1991 the world was overshadowed by the Cold War Repeatedly it seemed that in days even hours global nuclear conflict would sweep away much of the United States the Soviet Union and Europe They would be obliterated in what President Carter described as one long final and very bleak afternoon When the Cold War ended the Warsaw Pact was wound up and the vast military forces which had flourished for over forty years were disbanded As with all wars however it was only then that the realities of what had been involved began to emerge indeed much has remained hidden until now In *The Cold War* David Miller discloses not only the vast scope of the military resources involved but also how nearly threat came to terrible reality Most chillingly of all he reveals that while the menace of nuclear war predominated it was actually little understood even by the experts The book examines each military area in turn covering the formation of the two great alliances and the strategies and major weapons in the rival navies armies and air forces That the Cold War ended without a conflict was due to professionalism on both sides The result Miller suggests would have impressed the Chinese military strategist Sun Tzu who writing in the fifth century BC said that to subdue the enemy without fighting is the acme of skill

The Cold War Jeremy Black, 2015

The Cold War David M. O. Miller, 1998 From 1949 to 1991 the world was overshadowed by the Cold War and when it ended the Warsaw Pact was wound up and the vast military forces which had flourished for over 40 years were disbanded As with all wars however it was only then that the realities of what had been involved began to emerge In this work the author reveals the vast scope of the military resources involved as well as how threat nearly became a terrible reality He also show that while the menace of nuclear was was predominant it was actually little understood even by the experts The book examines each military area in turn covering the formation of the two great alliances and the strategies and major weapons in the rival navies armies and air forces

A *Military History of the Cold War, 1944-1962* Jonathan M. House, 2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The

invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces. Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty. In addition to examining the major confrontations nuclear and conventional between Washington, Moscow and Beijing including the crises over Berlin and Formosa, House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya, Kenya, Cyprus and Aden. Now more than fifty years after the events, House describes understanding the origins and trajectory of the Cold War is as important as ever. By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions. House's account of the complex relationship between diplomacy and military action directly relates to the insurgencies, counterinsurgencies and confrontations that now occupy our attention across the globe.

The Cold War Jeremy Black, 2011-01-01. Leading historian Jeremy Black offers a new and truly global interpretation of the Cold War. Professor Black argues that China has played a much more central role in the Cold War than is often acknowledged. The book will serve as a powerful introduction to the Cold War whilst offering many fresh insights to those who are familiar with its history. Jeremy Black is Professor of History at the University of Exeter.

A Military History of the Cold War, 1962-1991 Jonathan M. House, 2020-09-24. Study of the Cold War all too often shows us the war that wasn't fought. The reality of course is that many hot conflicts did occur, some with the great powers' weapons and approval, others without. It is this reality and this period of quasi-war and semiconflict that Jonathan M. House plumbs in *A Military History of the Cold War 1962-1991*, a complex case study in the Clausewitzian relationship between policy and military force during a time of global upheaval and political realignment. This volume opens a new perspective on three fraught decades of Cold War history, revealing how the realities of time, distance, resources and military culture often constrained and diverted the inclinations or policies of world leaders. In addition to the Vietnam War and nuclear confrontations between the USSR and the United States, this period saw dozens of regional wars and insurgencies fought throughout Asia, Africa and Latin America. Cuba, Pakistan, Indonesia, Israel, Egypt and South Africa pursued their own goals in ways that drew the superpowers into regional disputes. Even clashes ostensibly unrelated to the politics of East-West confrontation such as the Nigerian Biafran conflict, the Falklands/Malvinas War and the Indonesian occupation of East Timor involved armed forces, weapons and tactics developed for the larger conflict and thus come under House's scrutiny. His study also takes up nontraditional or specialized aspects of the period including weapons of mass destruction, civil-military relations, civil defense and control of domestic disorders. The result is a single integrated survey and analysis of a complex period in geopolitical history which fills a significant gap in our knowledge of the organization, logistics, operations and tactics involved in conflict throughout the Cold War.
