*The Color of Food* Natasha Bowens, 2015-05-01 Redefining the face of the American farmer The growing trend of organic farming and homesteading is changing the way the farmer is portrayed in mainstream media and yet farmers of color are still largely left out of the picture The Color of Food seeks to rectify this By recognizing the critical issues that lie at the intersection of race and food this stunning collection of portraits and stories challenges the status quo of agrarian identity Author photographer and biracial farmer Natasha Bowens quest to explore her own roots in the soil leads her to unearth a larger story weaving together the seemingly forgotten history of agriculture for people of color the issues they face today and the culture and resilience they bring to food and farming The Color of Food teaches us that the food and farm movement is about more than buying local and protecting our soil It is about preserving culture and community digging deeply into the places we've overlooked and honoring those who have come before us Blending storytelling photography oral history and unique insight these pages remind us that true food sovereignty means a place at the table for everyone If one imagines the typical American farmer many people visualize sun roughened skin faded overalls and calloused hands hands that are usually white While there's no doubt the growing trend of organic farming and homesteading is changing how the farmer is
