**An Analysis of John Lewis Gaddis's We Now Know** Scott Gilfillan, Jason Xidias, 2017-07-05 John Lewis Gaddis had written four previous books on the Cold War by the time he published We Now Know so the main thrust of his new work was not so much to present new arguments as to re examine old ones in the light of new evidence that began emerging from behind the Iron Curtain after 1990 In this respect We Now Know can be seen as an important exercise in evaluation Gaddis not only undertook to reassess his own positions arguing that this was the only intellectually honest course open to him in such

changing circumstances but also took the opportunity to address criticisms of his early works not least by post revisionist historians The straightforwardness and flexibility that Gaddis exhibited in consequence enhanced his book s authority He also deployed interpretative skills to help him revise his methodology and reinterpret key historical arguments integrating new comparative histories of the Cold War era into his broader argument

*Tin and Global Capitalism, 1850-2000* Mats Ingulstad, Andrew Perchard, Espen Storli, 2014-09-04 For most of the twentieth century tin was fundamental for both warfare and welfare The importance of tin is most powerfully represented by the tin can an invention which created a revolution in food preservation and helped feed both the armies of the great powers and the masses of the new urban society The trouble with tin was that economically viable deposits of the metal could only be found in a few regions of the world predominantly in the southern hemisphere while the main centers of consumption were in the industrialized north The tin trade was therefore a highly politically charged economy in which states and private enterprise competed and cooperated to assert control over deposits smelters and markets Tin provides a particularly telling illustration of how the interactions of business and governments shape the evolution of the global economic trade the tin industry has experienced extensive state intervention during times of war encompasses intense competition and cartelization and has seen industry centers both thrive and fail in the wake of decolonization The history of the international tin industry reveals the complex interactions and interdependencies between local actors and international networks decolonization and globalization as well as government foreign policies and entrepreneurial tactics By highlighting the global struggles for control and the constantly shifting economic geographical and political constellations within one specific industry this collection of essays brings the state back into business history and the firm into the history of international relations
