Bodies and Boundaries in Graeco-Roman Antiquity Thorsten Fögen, Mireille M. Lee, 2010-01-13 In the Graeco-Roman world the cosmic order was enacted in part through bodies. The evaluative divisions between for example women and men, humans and animals, barbarians and civilized people, slaves and free citizens or mortals and immortals could all be played out across the terrain of somatic difference embedded as it was within wider social and cultural matrices. This volume explores these thematics of bodies and boundaries to examine the ways in which bodies lived and imagined were implicated in issues of cosmic order and social organisation in classical antiquity. It focuses on the body in performance especially in a rhetorical context: the erotic body, the dressed body, pagan and Christian bodies as well as divine bodies and animal bodies. The articles draw on a range of evidence and approaches cover a broad chronological and geographical span and explore the ways bodies can transgress and dissolve as well shore up or even create boundaries and hierarchies. This volume shows that boundaries are constantly negotiated, shifted and refigured through the practices and potentialities of embodiment.

Male Nudity in the Greek Iron Age Sarah C. Murray, 2022-09-22 Why did the male nude come to occupy such an important place in ancient Greek culture? Despite extended debate the answer to this question remains obscure. In this book Sarah Murray demonstrates that evidence from the Early Iron Age Aegean has much to add to the discussion. Her research shows that aesthetics and practices involving male nudity in the Aegean had a complicated origin in prehistory. Murray offers a close analysis of the earliest male nudes from the late Bronze and Early Iron Ages which mostly take the form of small bronze votive figurines deposited in rural sanctuaries. Datable to the end of the second millennium BCE, these figurines she argues enlighten the ritual and material contexts in which nude athletics originated, complicating the rationalizing accounts present in the earliest textual evidence for such practices. Murray's book breaks new ground by reconstructing a scenario for the ritual and ideological origins of nudity in Greek art and culture.

Women and the Roman City in the Latin West Emily Hemelrijk, Greg Woolf, 2013-07-18 Roman cities as conventionally studied seem to be dominated by men. Yet as the contributions to this volume which deals with the Roman cities of Italy and the western provinces in the late Republic and early Empire show, women occupied a wide range of civic roles. Women had key roles to play in urban economies and a few were prominent public figures celebrated for their generosity and for their priestly eminence and commemorated with public statues and grand inscriptions. Drawing on archaeology and epigraphy on law and art as well as on ancient texts, this multidisciplinary study offers a new and more nuanced view of the gendering of civic life. It asks how far the experience of women of the smaller Italian and provincial cities resembled that of women in the capital, how women were represented in sculptural art as well as in inscriptions and what kinds of power or influence they exercised in the societies of the Latin West.
