The Carnivores Manifesto Eating Well Eating Responsibly And Eating Meat:

The Carnivore's Manifesto Patrick Martins, Mike Edison, 2014-08-02 We have evolved as meat eaters proclaims Patrick Martins and it's futile to deny it But given the destructive forces of the fast food industry and factory farming we need to make smart informed choices about the food we eat and where it comes from In 50 short chapters Martins cuts through organize zealotry and the misleading jargon of food labeling to outline realistic steps everyone can take to be part of the sustainable food movement With wit and insight and no small amount of provocation THE CARNIVORE S MANIFESTO is both a revolutionary call to arms and a rollicking good read that will inspire engage and challenge anyone interested in the way we eat today

The Carnivore's Manifesto Patrick Martins, 2014-06-10 One of The Atlantic's Best Food Books of 2014 fifty ways to be an enlightened carnivore while taking better care of our planet and ourselves from the founder of Slow Food USA We have evolved as meat eaters proclaims Patrick Martins and it's futile to deny it But given the destructive forces of the fast food industry and factory farming we need to make smart informed choices about the food we eat and where it comes from In 50 short chapters Martins cuts through organize zealotry and the misleading jargon of food labeling to outline realistic steps everyone can take to be part of the sustainable food movement With wit and insight and no small amount of provocation The Carnivore's Manifesto is both a revolutionary call to arms and a rollicking good read that will inspire engage and challenge anyone interested in the way we eat today

Meat Planet Benjamin Aldes Wurgaft, 2020-10-13 In 2013 a Dutch scientist unveiled the world's first laboratory created hamburger Since then the idea of producing meat not from live animals but from carefully cultured tissues has spread like wildfire through the media Meanwhile cultured meat researchers race against population growth and climate change in an effort to make sustainable protein Meat Planet explores the quest to generate meat in the lab a substance sometimes called cultured meat and asks what it means to imagine that this is the future of food Neither an advocate nor a critic of cultured meat Benjamin Aldes Wurgaft spent five years researching the phenomenon In Meat Planet he reveals how debates about lab grown meat reach beyond debates about food examining the links between appetite growth and capitalism Could satiating the growing appetite for meat actually lead to our undoing Are we simply using one technology to undo the damage caused by another Like all problems in our food system the meat problem is not merely a problem of production It is intrinsically social and political and it demands that we examine questions of justice and desirable modes of living in a shared and finite world Benjamin Wurgaft tells a story that could utterly transform the way we think of animals the way we relate to farmland the way we use water and the way we think about population and our fragile ecosystem's capacity to sustain life He argues that even if cultured meat does not succeed it functions much like science fiction as a crucial mirror that we can hold

call to action Marc Bekoff the world's leading expert on animal emotions gently shows that improving our treatment of animals is a matter of rethinking our many daily decisions and expanding our compassion footprint He demonstrates that animals experience a rich range of emotions including empathy and compassion and that they clearly know right from wrong Driven by moral imperatives and pressing environmental realities Bekoff offers six compelling reasons for changing the way we treat animals whether they're in factory farms labs circuses or our vanishing wilderness The result is a well researched informative guide that will change animal and human lives for the better **Faith, Force, and Reason** David M.
