dumping and waste of food Research Anthology on Strategies for Achieving Agricultural Sustainability Management Association, Information Resources, 2022-02-18 Agriculture has been an enduring human tradition key to survival and civilization. However, after the advent of industrialization and agricultural growth, the industry has been met with several challenges including pollution, land use, and food insecurity. With the agricultural industry contributing to pollution and emissions, many have found it imperative to investigate the causes and seek out solutions. The Research Anthology on Strategies for Achieving Agricultural Sustainability discusses the issues that the agricultural industry currently faces and the technological opportunities that can be explored to help protect and predict crop growth and achieve more resilient agricultural processes. It analyzes the impact of agricultural pollution and food insecurity on a global scale but also proposes solutions to promote agricultural sustainability. Covering topics such as bio farming, smart farming, and population growth, this book is an indispensable resource for government officials, agricultural scientists, farmers, students, and professors of higher education, activist groups, researchers, and academicians.

The Challenges of Agricultural Production and Food Security in Africa, 1989 Impact of Science on African Agriculture and Food Security P. Anandajayasekaram, M. Rukani, S. Babu, 2007. The need for agricultural research resources in the developing world cannot be underestimated, but the availability of such resources is often poor due to lack of funding and investment. In order for Africa and other such developing countries to achieve productivity in agriculture vital to food security, poverty reduction, and sustainable management of natural resources, investment and policy development needs to be assessed. This book, a joint effort from IFPRI, ILRI, and the Kellogg Foundation, explores the importance of impact assessment studies in Africa and assembles important evidence to pave the way for further much-needed investment in agricultural research all over the developing world.
