The Chinese American Family Album Dorothy Hoobler, Thomas Hoobler, 1994 The Chinese American Family Album is a scrapbook of family letters and diary entries official documents newspaper articles and excerpts from literature of the past and present a personal remembrance of an extended family of Chinese immigrants and their descendants As we read we begin to know this family almost as well as our own The letters written by the new immigrants to the folks left behind in China allow us to feel the ache of leaving home and family behind Clippings from newspapers and personal memories tell of the pain and fear and prejudice in the new country We learn about the building of the transcontinental railroad and how Chinese immigrants were the backbone of the work force tailing long hours under the worst conditions We see Chinatowns spring up wherever the immigrants landed and we see how the traditions and culture of China were both preserved and altered as the immigrants became Americanized But we also share the joy of first sighting the new homeland We follow families through the generations and see how they are living now and what they have brought to our country We read about famous Chinese Americans who have risen to the top of their fields such as athlete Michael Chang author Amy Tan musician Yo Yo Ma and Senator Hiram Fong And we see wonderful faces husbands alone in the new world families reunited new babies grandparents The unique carefully researched photographs make the participants in the Chinese American experience real people who have an impact on our lives Thomas and Dorothy Hoobler's *The Chinese American Family Album* makes the past experiences of these immigrants and those of their sons and daughters in all the generations since as real and immediate as the stories told by a favorite grandmother They bring us in like an embrace to the all encompassing ever growing multicultural family of Americans The titles in the American Family Albums series tell the multicolored and often heroic stories of American immigrant groups largely through their own words and pictures Like any family album or scrapbook the pages contain many period photographs and other memorabilia These join with original documents including selections from diaries letters memoirs and newspapers to bring the immigrant experience vividly to life Ancestry magazine, 1995-07 Ancestry magazine focuses on genealogy for today's family historian with tips for using Ancestry.com advice from family history experts and success stories from genealogists across the globe Regular features include Found by Megan Smolenyak reader submitted heritage recipes Howard Wolinsky's tech driven NextGen feature articles a timeline how to tips for Family Tree Maker and insider insight to new tools and records at Ancestry.com Ancestry magazine is published 6 times yearly by Ancestry Inc parent company of Ancestry.com *Chinese Immigrants, 1850-1900* Kay Melchisedech Olson, 2002 Discusses the reasons Chinese people left their homeland to come to America the experiences immigrants had in the new country and the contributions this cultural group made to American society Includes activities **Race and the Production of Modern American Nationalism** Reynolds J. Envisioning America Tritia Toyota, 2009-10-20 Envisioning America is a groundbreaking and richly detailed study of how naturalized Chinese living in Southern California become highly involved civic and political actors Like other immigrants to the United States their individual life stories are of survival becoming and belonging But unlike any other Asian immigrant group before them they have the resources Western based educations entrepreneurial strengths and widely based social networks in Asia to become fully accepted in their new homes Nevertheless Chinese Americans are finding that their social credentials can be a double edged sword Their complete incorporation as citizens is bounded both by mainstream discourse in the United States which paints them racially as perpetual foreigners and by an existing Asian Pacific American community not always accepting of their economic achievements and transnational ties Their attempts at inclusion are at the heart of a vigorous struggle for recognition and political empowerment This book challenges the notion that Asian Americans are apathetic or apolitical about civic engagement reminding us that political involvement would often have been a life threatening act in their homeland The voices of Chinese Americans who tell their stories in these pages uncover the ways in which these new citizens actively embrace their American citizenship and offer a unique perspective on how global identities transplanted across borders become rooted in the local

Viewpoints Mary Strong, Laena Wilder, 2009-05-01 Early in its history anthropology was a visual as well as verbal discipline But as time passed visually oriented professionals became a minority among their colleagues and most anthropologists used written words rather than audiovisual modes as their professional means of communication Today however contemporary electronic and interactive media once more place visual anthropologists and anthropologically oriented artists within the mainstream Digital media small sized and easy to use equipment and the Internet with its interactive and public forum websites democratize roles once relegated to highly trained

professionals alone. However, having access to a good set of tools does not guarantee accurate and reliable work. Visual anthropology involves much more than media alone. This book presents visual anthropology as a work in progress, open to the myriad innovations that the new audiovisual communications technologies bring to the field. It is intended to aid in contextualizing, explaining, and humanizing the storehouse of visual knowledge that university students and general readers now encounter, and to help inform them about how these new media tools can be used for intellectually and socially beneficial purposes. Concentrating on documentary photography and ethnographic film, as well as lesser known areas of study and presentation including dance, painting, architecture, archaeology, and primate research, the book's fifteen contributors feature populations living on all of the world's continents as well as within the United States. The final chapter gives readers practical advice about how to use the most current digital and interactive technologies to present research findings.
