The Cancer Chronicles Unlocking Medicines Deepest Mystery:

The Cancer Chronicles George Johnson, 2013-08-29 When the woman he loved was diagnosed with a metastatic cancer science writer George Johnson embarked on a journey to learn everything he could about the disease and the people who dedicate their lives to understanding and combating it What he discovered is that a revolution is now under way an explosion of new ideas about what cancer really is and where it comes from He combs through the realms of epidemiology clinical trials laboratory experiments and scientific hypotheses to reveal what we know and don't know about cancer showing why a cure remains such a slippery concept His luminous accounts describe tumors that evolve like alien creatures inside the body paleo oncologists who uncover petrified tumors clinging to the skeletons of dinosaurs and ancient human ancestors and the surprising reversals in science's comprehension of the causes of cancer with the foods we eat and environmental toxins playing a lesser role Perhaps most fascinating of all is how cancer borrows natural processes involved in the healing of a wound or the unfolding of a human embryo and turns them against the body Throughout his pursuit Johnson illuminates the human experience with elegiac grace bearing witness to the punishing gauntlet of consultations surgeries targeted therapies and other treatments Provocative and intellectually vibrant **The Cancer Chronicles** will challenge everything you thought you knew about the disease and provide hope for tomorrow and the future

Lawrence, Sarah Marie Wiebe, 2017-07-14 *Biopolitical Disaster* employs a grounded analysis of the production and lived experience of biopolitical life in order to illustrate how disaster production and response are intimately interconnected. The book is organized into four parts each revealing how socio environmental consequences of instrumentalist environmentalities produce disastrous settings and political experiences that are evident in our contemporary world. Beginning with *Commodifying crisis* the volume focuses on the inherent production of disaster that is bound to the crisis tendency of capitalism. The second part *Governmentalities of disaster* addresses material and discursive questions of governance the role of the state as well as questions of democracy. This part explores the linkage between problematic environmental rationalities and policies. Third the volume considers how and where the de valuation of life itself takes shape within the theme of *Affected bodies* and investigates the corporeal impacts of disastrous biopolitics. The final part *Environmental aesthetics and resistance* fuses concepts from affect theory feminist studies post positivism and contemporary political theory to identify sites and practices of political resistance to biopower. *Biopolitical Disaster* will be of great interest to postgraduates researchers and academic scholars working in Political ecology Geopolitics Feminist critique Intersectionality Environmental politics Science and technology studies Disaster studies Political theory Indigenous studies Aesthetics and Resistance.
