products are currently being administered to patients without their efficacy being evaluated in controlled studies for each patient the composition and route of administration may be different In addition many advanced administration systems have been developed or are still under development but few clinical trials have been completed This second volume welcomes submissions of Original Research and Review articles building on and focusing on the in depth analysis of the legal technological and pharmacological aspects related to the medical use of chemically characterized Cannabis based formulations Studies carried out in the past or still in progress will also be considered to assess what evolution there has been in using Cannabis to treat diseases or conditions We invite submissions dealing with the following themes including but not limited to Cannabis based formulations current and future applications in therapy Legal technological and pharmacological aspects related to the medical use of Cannabis Non clinical evidence supporting therapeutic applications of Cannabis including in vivo in invitro and in silico studies Important note for Authors Only studies dealing with highly purified chemically characterized Cannabis containing formulations where the chemical structure and purity must be precisely described by appropriate analytical methods will be considered for review in Experimental Pharmacology and Drug Discovery The following studies can be accepted for review in Ethnopharmacology if the extract is characterised in sufficient detail as is needed for a licensed medicine see here I Clinical Trial articles will be accepted for review only in the case that they are randomized double blinded and placebo controlled II Any studies relating to advanced formulations or galenic preparations to better evaluate the potential effects of their application in future therapies

Marijuana and Madness David Castle, Robin M. Murray, Deepak Cyril D'Souza, 2011-10-27 The second edition of this critically acclaimed and award winning text provides a comprehensive overview of the psychiatry and neuroscience of Cannabis sativa marijuana It outlines the very latest developments in our understanding of the human cannabinoid system and links this knowledge to clinical and epidemiological facts about the impact of cannabis on mental health Clinically focused chapters review not only the direct psychomimetic properties of cannabis but also the impact consumption has on the courses of evolving or established mental illnesses such as schizophrenia Effects of cannabis on mood are reviewed as are its effects on cognition This new edition has been extensively updated and expanded with ten new chapters to incorporate major new research findings This book will be of interest to all members of the mental health team as well as to neuroscientists epidemiologists public health specialists and those involved in drug and alcohol research

Cannabis Laboratory Fundamentals Shaun R. Opie, 2021-03-09 The legislative requirement for cannabis to undergo laboratory testing has followed legalization of medical and recreational use in every U S state to date Cannabis safety testing is a new investment opportunity within the emerging cannabis market that is separate from cultivation processing and distribution allowing individuals and organizations who may have been reluctant to enter previously a new entry route to the cannabis space However many of the costs timelines operational requirements and

compliance issues are overlooked by people who have not been exposed to regulated laboratory testing Cannabis Laboratory Fundamentals provides an in depth review of the key issues that impact cannabis testing laboratories and provides recommendations and solutions to avoid common but expensive mistakes The text goes beyond methodology to include sections on economics regulation and operational challenges making it useful for both new and experienced cannabis laboratory operators as well as all those who want to understand the opportunities and risks of this industry

Clearing the smokescreen: The current evidence on cannabis use Elizabeth C. Temple, Richard Hammersley, Margriet van Laar, Rhonda F. Brown, 2015-05-08 Cannabis remains the most commonly used illicit substance world wide with international estimates indicating that 2 8% 4 5% of the global population use cannabis each year This prevalence rate has not changed substantially in the past decade and there is no indication that it will do so in the next decade In line with this many prominent organizations and individuals have acknowledged that the war on drugs has failed and are now calling for a rethink on drug related policy and legal frameworks With a growing number of jurisdictions across the world heeding this call and introducing legislation to decriminalize or legalize cannabis use it is essential that any changes to legal frameworks and public health policies are based on the best available scientific evidence To facilitate the adoption of an evidence based approach to cannabis policy the aim of this Research Topic was to gather a comprehensive body of research to clarify the current state of evidence relating to cannabis use Of interest were articles addressing the following questions How do we study cannabis use e g recruitment measuring dose use assessing dependence problematic use confounding translation of findings from animal studies What do we know about cannabis use e g patterns contexts methods of use What do we know about people who use cannabis e g who uses cannabis and why What are the social settings norms and cultural values that go along with cannabis use How is problematic cannabis use as opposed to mere use defined judged and constructed in different societies What do we know about the effects outcomes of cannabis use e g acute short and long term harms benefits What do we know about the factors associated with the initiation continuance and cessation of cannabis use What do we know about the medicinal use of cannabis e g who uses medicinally and why efficacy effectiveness in different clinical populations comparison with other medications What do we know about treatment for people who engage in problematic cannabis use e g who seeks is referred to treatment and why efficacy and effectiveness What do we know about cannabis e g pharmacodynamics pharmacokinetics of different strains cultivation preparation and consumption methods How do policy and legal frameworks impact on the people who use cannabis What is the future for cannabis research e g potential avenues for future research aspects needing more attention innovative approaches political funding issues affecting cannabis research
