China's Grand Strategy and Australia's Future in the New Global Order Geoff Raby, 2025-05-14 The US dominated world order has been replaced by a multipolar order but its closest allies such as Australia seek to retain American primacy adding dangerously to heightened geopolitical competition between the dominant and the ascendant power China Where the first great power shift of the twenty first century was across the Pacific from the United States to China the next great power shift is now underway from Russia to China Putin's invasion of Ukraine has depleted Russia of its power and influence across Eurasia while China's continues to grow As China consolidates its power across Eurasia it can turn to project power globally just as the US did at the turn of the last century when it cemented its power over the western hemisphere Diplomatically Australia is forced to navigate an increasingly unfamiliar world where the guarantor of its security is no longer the sole dominant power while China remains its most important economic partner Is Australia agile enough to walk the fine line of supporting US primacy in the Asia Pacific while providing a bulwark against China's ambitions In *China's Grand Strategy and Australia's Future in the New Global Order* Geoff Raby believes something has to give and unpacks the ramifications for Australia

Gold Mountain Turned to Dust John R. Wunder, 2018-09-15 This legal history of the Chinese experience in the American West based on the author's lifetime of research in legal sources all over the West from California to Montana to New Mexico serves as a basic account of the legal treatment of Chinese immigrants in the West

Conspiracy Theories in the Time of Covid-19 Clare Birchall, Peter Knight, 2022-11-04 *Conspiracy Theories in the Time of Covid 19* provides a wide ranging analysis of the emergence and development of conspiracy theories during the Covid 19 pandemic with a focus on the US and the UK The book combines digital methods analysis of large datasets assembled from social media with politically and culturally contextualised close readings informed by cultural studies In contrast to other

studies which often have an alarmist take on the infodemic it places Covid 19 conspiracy theories in a longer historical perspective It also argues against the tendency to view conspiracy theories as merely evidence of a fringe or pathological way of thinking Instead the starting assumption is that conspiracy theories including Covid 19 conspiracy theories often reflect genuine and legitimate concerns even if their factual claims are wide of the mark The authors examine the nature and origins of the conspiracy theories that have emerged the identity and rationale of those drawn to Covid 19 conspiracism how these conspiracy theories fit within the wider political economic and technological landscape of the online information environment and proposed interventions from social media platforms and regulatory agencies This book will appeal to anyone interested in conspiracy theories misinformation culture wars social media and contemporary society The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

Urban Infrastructure Remo Dalla Longa, 2023-03-01 The book deals with the concept of urban infrastructure and the strong evolution of globalization in particular the driving force taken by global cities Urban infrastructure is a constituent part of the global cities both have a synergistic evolution The main reference is to western global cities in the intertwining of financialization settling and brownfield which is a little different from the urbanization of other global cities of other non developed countries or emerging countries There is therefore a significant link between globalization and urban infrastructure The occurrence of slowbalization can have consequences on urban areas infrastructures and more generally on the different dichotomy between global city and nation With the pandemic infectious and the post COVID there is already a different configuration between the global city and the rest of the national territory A driving element of the urban infrastructure and the global city has been the financialization and identification of assets within global cities Urban infrastructure as an asset has grown considerably in the last two decades in the wake of what has already been highlighted previously for real estate There are contiguous issues that affect the concept of urban infrastructures and they are the enormous growth of finance and the landings of this in the great cities of the world with investments that first involved Real Estate and then urban infrastructures There has also been a technological revolution that has merged the ubiquitous technological infrastructure with other more traditional components of the infrastructure even apparently recent themes such as smart cities come from this evolutionary trend and merge with urban infrastructures The theme of smart cities if properly interpreted gives strength to the concept of urban infrastructure

Rumbles of Thunder Steve Chan, 2022-12-27 It is widely believed that shifts in the balance of power between an established hegemon and a rising upstart can lead to war To what extent does this proposition hold true for Sino American relations today Steve Chan examines a range of international relations theories and popular narratives that suggest an elevated risk of confrontation between the two powers Probing the recent deterioration in Sino American relations he considers whether several factors that can raise or lower international tension apply to the current situation Chan demonstrates that power shifts do not

preordain violent outcomes nor does their absence ensure peace Criticizing overly mechanistic frameworks he emphasizes that domestic politics international political economy and the choices of individual leaders are all crucial to understanding why wars happen Chan demonstrates that claims of a rising China catching up to and even poised to overtake the United States are alarmist American structural advantages will endure for some time to come Contrary to prevailing narratives China does not act like a revisionist power seeking to overturn the system while the United States far from defending the international order has frequently undermined it However Chan cautions Taiwan remains a flashpoint for a possible Sino American conflict Bringing together expertise in IR theory and keen political acumen Rumbles of Thunder challenges conventional wisdom on the likelihood of war between the United States and China
