Application and Evaluation of Acupuncture in the Treatment of Neurological Diseases Liming Lu, Nenggui

Xu, Myeong Soo Lee, Chunzhi Tang, Yong Tang, Bing Zhu, 2023-06-21 Neurological disorders such as Alzheimer's disease and Parkinson's disease are an important cause of disability and death worldwide and pose a serious burden on the global health system over the past 30 years. Acupuncture as the most widely used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions. Acupuncture can treat more than 300 kinds of diseases especially for neurological diseases. Due to the unique advantages of acupuncture such as good therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability and scientific vigor of this complementary and alternative therapeutic approach. There are still many problems unanswered in the current clinical research on acupuncture for the treatment of neurological diseases. First of all clinical research is lagging behind due to the lack of emphasis on modern advanced methods and analytical techniques e.g. artificial intelligence, omics analysis, bioinformatics analysis, data mining and multidisciplinary integration process. Secondly the quality of reports on most clinical studies of acupuncture treatment for neurological diseases is extremely low. Most clinical studies have not adopted standardized methodological evaluations, authoritative disease diagnosis standards and efficacy evaluation standards. The lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research. Thirdly there is a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases. Therefore strictly designed clinical research and in depth and systematic analysis method are currently needed to provide high quality evidence for acupuncture treatment of neurological diseases. In this Research Topic we hope to further understand the role of acupuncture in the treatment of neurological diseases through clinical research and secondary research. The range of acupuncture includes manual acupuncture, electro acupuncture, body needling, auricular acupuncture, scalp acupuncture, laser acupuncture and acupressure etc. Neurological diseases include stroke, meningitis, encephalitis, tetanus, Alzheimer's disease and other dementias, Parkinson's disease, epilepsy, multiple sclerosis, motor neurone disease, migraine, tense type headaches, headaches from drug overuse and others.

Cumulated Index Medicus, 1987 *Index Medicus*, 2001-07 Vols for 1963 include as pt 2 of the Jan issue. Medical subject headings **Advances in the Treatment of Sexual Precocity and Infertility** Dimitrios T. Papadimitriou, Djuro Macut, George Mastorakos, Constantine A. Stratakis, Nikos Vlahos, 2024-12-02 Pediatric adolescent endocrinology and gynecology are entering a new era. Whole exome sequencing approaches with targeted gene panels have become widely available even for prenatal screening leading to the elucidation of genetic etiologies in endocrine and gynecological diseases and opening the road for genetic precision medicine and the development of specific therapies. The transition from the end of puberty to the attainment of an adult phenotype may be a very long way up to 10 years or even longer. Meanwhile conventional approaches to hormone deficiencies are rapidly changing as are the options for treatment of sexual precocity and infertility. Commercially available rLH, rFSH preparations in the form of pens used mainly for fertility

induction in women are now being investigated in hypogonadotropic hypogonadism aiming to a physiological replacement therapy not only at puberty but also to the replacement of the missing mini puberty crucially important for fertility and the very essence of the male sex identity itself Furthermore they provide an alternative to surgery especially for bilateral cryptorchidism preserving future fertility *Braddom's Physical Medicine and Rehabilitation* David X.
