Bremer, 1994 Puritan studies is one of the most heavily researched areas of scholarship in both England and the United States In this in depth exploration of the relationship between Puritans in England and New England Francis J Bremer challenges the view that the colonists turned away from English Puritans in the 1640s Rather he convincingly demonstrates that the two communities retained a complex symbiotic connection a communion throughout the seventeenth century and that the clergy on both sides of the Atlantic saw themselves as closely linked in their spiritual mission Focusing on the interaction between social experience and the shaping of belief Bremer thoroughly analyzes how Puritan clergymen of a congregational persuasion came together in a godly communion and examines how that communion sustained them in times of trouble and physical dispersal He explains the social forces that led to the articulation of early Congregationalism and details the significance of trans Atlantic religious exchanges through correspondence associations publications and other devices Bremer traces the first generation Puritans from their formative years at Cambridge University through the creation of a network of clerical friendships through the flight to Holland and to New England to the death of Oliver Cromwell and the beginnings of division within Congregationalism This thought provoking volume makes a
