

A photograph of a man standing on a rocky ledge overlooking a group of people sitting on the ground under a thatched shelter. The man standing is shirtless, wearing a white loincloth, and holding a wooden staff. The group of people sitting on the ground are also shirtless, wearing loincloths, and are looking towards the camera. The shelter is made of a thatched roof supported by wooden poles. The background is a rocky, forested area.

The Collectors of Lost Souls Warwick Anderson, 2008-11-28 This riveting account of medical detective work traces the story of kuru a fatal brain disease and the pioneering scientists who spent decades searching for its cause When whites first encountered the Fore people in the isolated highlands of colonial New Guinea during the 1940s and 1950s they found a people in the grip of a bizarre epidemic Women and children succumbed to muscle weakness uncontrollable tremors and lack of coordination until death inevitably supervened Facing extinction the Fore attributed their unique and terrifying affliction to a particularly malign form of sorcery The Collectors of Lost Souls tells the story of the resilience of the Fore through this devastating plague their transformation into modern people and their compelling attraction for a throng of eccentric and adventurous scientists and anthropologists Battling competing scientists and the colonial authorities the brilliant and troubled American doctor D Carleton Gajdusek determined that the cause of kuru was a new and mysterious agent of infection which he called a slow virus now called prions Anthropologists and epidemiologists soon realized that the Fore practice of eating their loved ones after death had spread the slow virus Though

the Fore were never convinced Gajdusek received the Nobel Prize for his discovery The study of kuru opened up a completely new field of medical investigation challenging our understanding of the causes of disease But The Collectors of Lost Souls is far more than a tantalizing case study of scientific research in the twentieth century It is a story of how a previously isolated people made contact with the world by engaging with its science rendering the boundary between primitive and modern completely permeable It tells us about the complex and often baffling interactions of researchers and their erstwhile subjects on the colonial frontier tracing their ambivalent exchanges passionate engagements confused estimates of value and moral ambiguities Above all it reveals the primitive foundations of modern science This astonishing story links first contact encounters in New Guinea with laboratory experiments in Bethesda Maryland sorcery with science cannibalism with compassion and slow viruses with infectious proteins reshaping our understanding of what it means to do science Insider Trading Naomi Pfeffer,2017-09-12 The cadaver industry in Britain and the United States its processes and profits Except for organ transplantation little is known about the variety of stuff extracted from corpses and repurposed for medicine A single body might be disassembled to provide hundreds of products for the millions of medical treatments performed each year Cadaver skin can be used in wound dressings corneas used to restore sight Parts may even be used for aesthetic enhancement such as liquefied skin injections to smooth wrinkles This book is a history of the nameless corpses from which cadaver stuff is extracted and the entities involved in removing processing and distributing it Pfeffer goes behind the mortuary door to reveal the technical imaginative and sometimes underhanded practices that have facilitated the global industry of transforming human fragments into branded convenience products The dead have no need of cash but money changes hands at every link of the supply chain This book refocuses attention away from individual altruism and onto professional and corporate ethics Afterlife of Empire Jordanna Bailkin,2012-11-15 This book investigates how decolonization transformed British society in the 1950s and 1960s and examines the relationship between the postwar and the postimperial Cryopolitics Joanna Radin,Emma Kowal,2017-03-24 The social political and cultural consequences of attempts to cheat death by freezing life As the planet warms and the polar ice caps melt naturally occurring cold is a resource of growing scarcity At the same time energy intensive cooling technologies are widely used as a means of preservation Technologies of cryopreservation support global food chains seed and blood banks reproductive medicine and even the preservation of cores of glacial ice used to study climate change In many cases these practices of freezing life are an attempt to cheat death Cryopreservation has contributed to the transformation of markets regimes of governance and ethics and the very relationship between life and death In Cryopolitics experts from anthropology history of science environmental humanities and indigenous studies make clear the political and cultural consequences of extending life and deferring death by technoscientific means The contributors examine how and why low temperatures have been harnessed to defer individual death through freezing whole human bodies to defer nonhuman species death by freezing tissue from endangered animals to

defer racial death by preserving biospecimens from indigenous people and to defer large scale human death through pandemic preparedness The cryopolitical lens emphasizing the roles of temperature and time provokes new and important questions about living and dying in the twenty first century Contributors Warwick Anderson Michael Bravo Jonny Bunning Matthew Chrulew Soraya de Chadarevian Alexander Friedrich Klaus Hoeyer Fr d ric Keck Eben Kirksey Emma Kowal Joanna Radin Deborah Bird Rose Kim TallBear Charis Thompson David Turnbull Thom van Dooren Rebecca J H Woods

Pentecostalism and Witchcraft Knut Rio,Michelle MacCarthy,Ruy Blanes,2017-10-29 This open access book presents fresh ethnographic work from the regions of Africa and Melanesia where the popularity of charismatic Christianity can be linked to a revival and transformation of witchcraft The volume demonstrates how the Holy Spirit has become an adversary to the reconfirmed presence of witches demons and sorcerers as manifestations of evil We learn how this is articulated in spiritual warfare in crusades and in healing or witch killing raids The contributors highlight what happens to phenomena that people address as locally specific witchcraft or sorcery when re molded within the universalist Pentecostal demonology vocabulary and confrontational methodology Routledge Handbook of Interpretive Political Science Mark Bevir,R. A. W. Rhodes,2015-07-03 Interpretive political science focuses on the meanings that shape actions and institutions and the ways in which they do so This Handbook explores the implications of interpretive theory for the study of politics It provides the first definitive survey of the field edited by two of its pioneers Written by leading scholars from a range of disciplinary backgrounds the Handbook s 32 chapters are split into five parts which explore the contrast between interpretive theory and mainstream political science the main forms of interpretive theory and the theoretical concepts associated with interpretive political science the methods used by interpretive political scientists the insights provided by interpretive political science on empirical topics the implications of interpretive political science for professional practices such as policy analysis planning accountancy and public health With an emphasis on the applications of interpretive political science to a range of topics and disciplines this Handbook is an invaluable resource for students scholars and practitioners in the areas of international relations comparative politics political sociology political psychology and public administration **Keywords for Health Humanities** Sari Altschuler,Jonathan M. Metz,Priscilla Wald,2023-08-29 Introduces key concepts and debates in health humanities and the health professions Keywords for Health Humanities provides a rich interdisciplinary vocabulary for the burgeoning field of health humanities and more broadly for the study of medicine and health Sixty five entries by leading international scholars examine current practices ideas histories and debates around health and illness revealing the social cultural and political factors that structure health conditions and shape health outcomes Presenting possibilities for health justice and social change this volume exposes readers from curious beginners to cultural analysts from medical students to health care practitioners of all fields to lively debates about the complexities of health and illness and their ethical and political implications A study of the vocabulary that comprises and shapes a broad understanding of health and the practices

of healthcare Keywords for Health Humanities guides readers toward ways to communicate accurately and effectively while engaging in creative analytical thinking about health and healthcare in an increasingly complex world one in which seemingly straightforward beliefs and decisions about individual and communal health represent increasingly contested terrain The online essays for all Keywords titles can be found here keywords.nyupress.org

The Neurological Patient in History L. S. Jacyna, Stephen T. Casper, 2012 Parkinson's Alzheimer's Tourette's multiple sclerosis stroke all are neurological illnesses that create dysfunction distress and disability With their symptoms ranging from impaired movement and paralysis to hallucinations and dementia neurological patients present myriad puzzling disorders and medical challenges Throughout the nineteenth and twentieth centuries countless stories about neurological patients appeared in newspapers books medical papers and films Often the patients were romanticized indeed it was common for physicians to cast neurological patients in a grand performance allegedly giving audiences access to deep philosophical insights about the meaning of life and being Beyond these romanticized images however the neurological patient was difficult to diagnose Experiments often approached unethical realms and treatment created challenges for patients courts caregivers and even for patient advocacy organizations In this kaleidoscopic study the contributors illustrate how the neurological patient was constructed in history and came to occupy its role in Western culture Stephen T. Casper is Assistant Professor in Humanities and Social Sciences at Clarkson University L. Stephen Jacyna is reader in the History of Medicine and Director of the Centre for the History of Medicine at University College London

The Turtle and the Caduceus Professor David Brewster AM, 2010-01-11 The Turtle and the Caduceus are metaphors for the impact of Western medicine the Caduceus upon a traditional Pacific island culture the Turtle through the history of a school which started training native medical practitioners 125 years ago David Brewster the former Dean of Fiji School of Medicine tells the fascinating tale of how a devastating measles epidemic and pro indigenous benign colonialism led the foundation of this unique school Then Rockefeller philanthropy helped to transform it into a regional institution with an excellent reputation However its evolution into a modern university medical school was hampered by local politics and internal dissensions related to ethnic strife between the indigenous and Indian populations of Fiji which also resulted in four military coups with economic stagnation and migration of medical graduates This cautionary tale has important lessons for the relatively neglected disciplines of Pacific island history and medicine
