The Colonial Present Afghanistan Palestine Iraq:

The Colonial Present Derek Gregory, 2004-07-30 In this powerful and passionate critique of the war on terror in Afghanistan and its extensions into Palestine and Iraq Derek Gregory traces the long history of British and American involvements in the Middle East and shows how colonial power continues to cast long shadows over our own present Argues the attacks on the World Trade Center and the Pentagon on September 11 activated a series of political and cultural responses that were profoundly colonial in nature The first analysis of the war on terror to connect events in Afghanistan Palestine and Iraq Traces the connections between geopolitics and the lives of ordinary people Richly illustrated and packed with empirical detail

Thinking Palestine Ronit Lentin, 2013-07-18 This book brings together an interdisciplinary group of Palestinian Israeli American British and Irish scholars who theorise the question of Palestine Critically committed to supporting the Palestinian quest for self determination they present new theoretical ways of thinking about Palestine These include the Palestinization of ethnic and racial conflicts the theorization of Palestine as camp ghetto and prison the tourist activist gaze the role of gendered resistance the centrality of the memory of the 1948 Nakba catastrophe to the contemporary understanding of the conflict and the historic roots of the contemporary discourse on Palestine The book offers a novel examination of how the Palestinian experience of being governed under what Giorgio Agamben names a state of exception may be theorised as paradigmatic for new forms of global governance An indispensable read for any serious scholar

Southern and Postcolonial Perspectives on Policing, Security and Social Order Roxana Pessoa Cavalcanti, Peter Squires, Zoha Waseem, 2024-11-12 Postcolonial legacies continue to impact upon the Global South and this edited collection examines their influence on systems of policing security management and social ordering

Expanding the Southern Criminology agenda the book critically examines social harms violence and war crimes human rights abuses environmental degradation and the criminalization of protest The book asks how current states of policing came about their consequences and whose interests they continue to serve through vivid international case studies including prison struggles in Latin America and the misuse of military force Challenging current criminological thinking on the Global South the book considers how police and state overreach can undermine security and perpetuate racism and social conflict

Proto-Algorithmic War Stefka Hristova, 2022-07-16 During the Iraq War American soldiers were sent to both fight an enemy and to recover a failed state in pixelated camouflage uniforms accompanied by robots and armed with satellite maps and biometric hand held scanners The Iraq War however was no digital game massive scale physical death and destruction counter the vision of a clean replayable war The military policy of the United States and not the actual experience of war has been rooted in the logic of digital and nascent algorithmic technology This logic attempted to reduce culture society as well as the physical body and environment into visual data that lacks cultural and historical context This book details the emergence of a nascent algorithmic war culture in the context of the Iraq War 2003 2010 in relation to the data driven early 20th century British Mandate for Iraq Through a series of five inquiries into the ways in which the Iraq War attempted to and often failed to see population and territory as digital and further proto algorithmic entities it offers an insight into the digitization and further unmanned automaton of war It does so through a comparative historical framework reaching back to the quantification techniques harnessed during the British Mandate for Iraq 1918 1932 in order to explicate the parallels and complicated the diversions between the numerical logics that have driven both military state building enterprises

Walzer, Just War and Iraq Ronan O'Callaghan, 2015-10-08 In recent years questions of ethical responsibility and justice in war have become increasingly significant in international relations This focus has been precipitated by United States U S led invasions in Afghanistan and Iraq In turn Western conceptions of ethical responsibility have been largely informed by human rights based understandings of morality This book directly addresses the question of what it means to act ethically in times of war by drawing upon first hand accounts of U S war fighting in Iraq during the 2003 invasion and occupation The book focuses upon the prominent rights based justification of war of Michael Walzer Through an in depth critical reading of Walzer s work this title demonstrates the broader problems implicit to human rights based justifications of war and elucidates an alternative account of ethical responsibility ethics as response Putting forward a compelling case for people to remain troubled and engaged with questions of ethical responsibility in war this work will be of great interest to students and scholars in a range of areas including international relations theory ethics and security studies

Reconstructing Conflict Scott Kirsch, Colin Flint, 2016-04-08 Reconstruction the rebuilding of state economy culture and society in the wake of war is a powerful idea and a profoundly transformative one From the refashioning of new landscapes in bombed out cities and towns to the reframing of national identities to accommodate changed historical narratives the term has become synonymous

with notions of post conflict society it draws much of its rhetorical power from the neat demarcation both spatially and temporally between war and peace The reality is far more complex In this volume reconstruction is identified as a process of conflict and of militarized power not something that clearly demarcates a post war period of peace Kirsch and Flint bring together an internationally diverse range of studies by leading scholars to examine how periods of war and other forms of political violence have been justified as processes of necessary and valid reconstruction as well as the role of war in catalyzing the construction of new political institutions and destroying old regimes Challenging the false dichotomy between war and peace this book explores instead the ways that war and peace are mutually constituted in the creation of historically specific geographies and geographical knowledges *Colonialism, Tourism and Place* Denis Linehan, Ian D. Clark, Philip F. Xie, 2020-10-30 This unique book examines the vital and contested connections between colonialism and tourism which are as lively and charged today as ever before Demonstrating how much of the marketing of these destinations represents the constant renewal of colonialism in the tourism business this book illustrates how actors in the worldwide tourism industry continue to benefit from the colonial roots of globalisation **Israel and Settler Society** Lorenzo Veracini, 2006-01-20 The struggle between Israel and the Palestinians is not unique whatever the media may suggest Lorenzo Veracini argues that the conflict is best understood in terms of colonialism as like many other societies Israel is a settler society Looking at the evolution of other colonial regimes apartheid South Africa French Algeria and Australia Veracini presents a thoughtful interpretation of the dynamics of colonialism He challenges two important myths firstly that the Israeli Palestinian dispute is unique and defies comparative approaches and secondly that the struggle is mainly based in nationality and religion and therefore different to typical colonial conflicts Comparing and contrasting official apartheid regimes with the more recent history of Israel and Palestine he offers a critical perspective on colonialism as well as important new insights into patterns of imperialism today
