Newcombe,2025-10-14 Religion Spirituality and Public Health focuses on exploring the role of different ways of knowing or arriving at truth i e epistemes particularly those found in religious and alternative health milieus While biomedical solutions offer a dominant narrative these are articulated differently in global contexts Moreover individuals often draw upon alternative framings that are sometimes oppositional to and at other times engaged with directives from medical and governmental authorities The focus of this volume is worldviews and epistemes that are often marginalised or rejected in dominant discourses from shamanism in Korea to African Pentecostalism in Britain and from global online AntiVax narratives to traditional Siddha medicine in South India Detailed case studies explore the contested competing and strategically aligned relationships between mainstream and marginal epistemes between religious healing spirituality and biomedicine and between politics and belief These explorations promote greater insight into how marginalised religious epistemes are employed Which beliefs and practices are drawn upon to create meaningful and effective responses And how can we better understand the depth and breadth of these reactions to design more successful public health strategies for future global health crises Children's Writers' & Artists' Yearbook 2026 Bloomsbury Publishing,2025-07-17 Knowledge advice
