Financial Determinants of SME Activity in Developing Countries Piotr Łasak, 2022-01-01 **PURPOSE** The traditional sources of financing bank loans cannot be treated as an essential source of financing for SMEs in developing countries. For this reason, this group of entities uses many alternative sources from bootstrapping to microfinance and crowdfunding. During the last decade, a significant contribution in this area has been done by financial technology. The purpose of this study is threefold: 1 to present the role of financial technologies in financing SMEs; 2 to examine the role of entities based on financial technology in financing SMEs in developing countries; and 3 to consider other non-bank aspects of financing SMEs leading to the improvement of the financial situation of these entities. The in-depth analysis of these entrepreneurial finance practices will be developed in the following papers presented in this Issue. **METHODOLOGY** This study employs a theoretical approach based on a narrative literature review. The primary attention is focused on applying financial technology as a stimulant for the finance of SMEs in developing countries. **FINDINGS** As a consequence of the financing gap for SMEs within the traditional financial system, these entities use non-bank financing based on financial technology. The research confirms that financial technology plays a crucial role in fostering the financial situation of SMEs in developing countries and providing greater financial inclusion for these entities. Both financial technology and enterprises based on this technology contribute significantly to the improvement of efficiency of financing SMEs in emerging markets. They also provide a broader range of services than were offered by the traditional financial sector. Regarding the other aspects of SME finance, it is essential to implement such ways of financing like microfinance services and crowdfunding. Such funding mechanisms together with the budget process and the compliance under the conditions of e-tax systems are important determinants of current entrepreneurial finance. **IMPLICATIONS** The paper describes the financing of SMEs in developing countries. The in-depth picture of the SME's financial situation focusing on the technological development in this area provides essential insight into this still poorly explored area. It also offers important premises for shaping the post-pandemic policy to support their further growth. **ORIGINALITY VALUE** Despite growing theoretical and empirical literature about entrepreneurial finance, this study aims to contribute to the role of financial technology in this area. The impact of financial technologies and the role of fintech-based entities on SME activity in developing countries are still poorly researched. Moreover, the research provides a brief overview of other SME funding sources and their determinants in this group of countries. **Living Forever** Jan Fawcett, 2013-05-20 So easily could one imagine this story infused with the rich detail of character setting and motivation that would transform it into a memorable work of brilliant insight. **Clarion Review** Throughout this compelling story, Fawcett makes fascinating inquiries about life evolution and the true nature of man, proving that with all of our technology, the human mind still remains the most powerful and mysterious tool. **Kirkus Review** Faced with imminent death after a grim cancer diagnosis, sixty-eight-year-old Dr. Ian Farrell decides that he and his wife Caitlin should live life fully and appreciate every

moment he has left together After Ian and Caitlin return to Chicago from a spontaneous trip to Santa Fe Ian has no idea that he will soon have a tempting carrot dangled in front of his nose the chance to live forever When Ian lands back in the hospital for more tests two agents from a governmental research agency ask him to submit to an attempted transfer of his mind to an electronic chip With very little time left to live Ian accepts He flies to Project Phoenix the next day with Caitlin and Colonel Wild Bill Clausen the head of Project Phoenix After he bids his wife good bye Ian swears his allegiance to the United States lies on a table and heads into the bowels of a machine that will change his destiny forever In this intriguing novel a dying man now left with nothing but his consciousness must create a new identity and partner with a brilliant neurophysicist in order to save humankind from a destructive technology

The Materiality of Narrative Dynamics Stefan Iversen, Evan Van Tassell, 2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the unfolding of stories over time The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled
