SYMLOG Robert Freed Bales, Stephen P. Cohen, Stephen A. Williamson, 1979 **Social Interaction Systems** Robert Bales, 2017-09-08 Social Interaction Systems is the culmination of a half century of work in the field of social psychology by Robert Freed Bales a pioneer at the Department of Social Relations at Harvard University Led by Talcott Parsons Gordon W Allport Henry A Murray and Clyde M Kluckhohn the Harvard Project was intended to establish an integrative framework for social psychology one based on the interaction process augmented by value content analysis Bales sees this approach as a personal involvement that goes far beyond the classical experimental approach to the study of groups Bales developed SYMLOG which stands for systematic multiple level observation of groups The SYMLOG Consulting Group approach was worldwide as well as interactive It created a data bank that made possible a search for general laws of human interaction far beyond anything thus far known In his daring search for universal features Bales redefines the fundamental boundaries of the field and in so doing establishes criteria for the behavior and values of leaders and followers Bales offers a new field theory an appreciation of the multiple contexts in which people live Bales does not aim to eradicate differences but to understand them In this sense the values inherent in any interaction situation permit the psychologist to appreciate the sources of polarization as they actually exist between conservative and liberal individualistic and authoritarian libertarian and communitarian Bales repeatedly emphasizes that the mental processes of individuals and their social interactions take place in systematic contexts which can be measured Hence they permit explanation and prediction of behavior in a more exact way than in past traditions Bales has offered a pioneering work that has the potential to move us into a new theoretical epoch no less than a new century His work holds out the promise of synthesis and support for psychologists sociologists and all who work with groups and organizations of all kinds **Encyclopedia of Group Processes and Intergroup Relations** John M Levine, Michael A. Hogg, 2010 This two volume encyclopedia covers concepts from across the spectrum from group phenomena to phenomena influenced by group membership from small group interaction to intergroup relations on a global scale *Social Groups in Action and Interaction* Charles Stangor, 2015-10-16 Social Groups in Action and Interaction reviews and analyzes the human group as it operates to create both social good and potentially social harm It summarizes current knowledge and contemporary research with real world examples in succinct yet engaging chapters to help students understand and predict group behavior Unlike other texts the book considers a wide range of topics such as conformity leadership task performance social identity prejudice and discrimination from both an intragroup and an intergroup perspective By looking at behavior both within and between groups it bridges the gap between these interconnected approaches The second edition is thoroughly updated to include new discussion of the biology and neuroscience of group formation recent developments in social identity theory and recent advances in the study of social networks It also includes questions for review and discussion in the classroom It provides the most comprehensive and essential resource for courses

Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08 The Handbook of Group Communication Theory and Research establishes a central resource for the field documenting and synthesizing the work done in group communication's 50 year history. With contributions from the most experienced and respected scholars in the field, the editors Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future.
