Integrated care aims to address inequality through removing fragmented health and social care. It is being adopted worldwide including in the UK where the NHS is undergoing significant transformation as it introduces integrated care for all providers. This new book aims to equip students and practitioners to take the lead in this new model of care delivery. It will help them understand the key principles of integrated care and then apply these to the design, implementation and practice of integrated care in their own work. Written by academics and operational healthcare leaders, this book is ideal for final year students of nursing, allied health and social care postgraduates and all nursing and allied health professionals who will be required to work within the UK's new integrated care systems. Comprehensive coverage of the design, implementation and practice of integrated care. Covers theory and concepts of integrated care as well as applicability to practice for individuals, organisations and systems. Presents a comprehensive and up-to-date evidence base for integrated care. Accessible to a range of practitioners. Wide range of case studies provide real-life examples of how integrated care has been applied in different areas. Contributions from academics across disciplines including nursing, occupational therapy, social care and public health. **The High-Impact Digital Library** Jeremy Myntti, Anna Neatrou, Rachel Jane Wittmann, Rebekah Cummings, Jane D. Monson, Megan Myres McMillan, 2025-04-10. Digital library terminology like accessible, discoverable and searchable usually presumes passive collections waiting to be found by motivated information seekers. Rarely do we envision collection managers initiating outreach with those most likely to benefit from the collections. This new collection from Core flips the script, exploring the many ways that digital library practitioners at various types of cultural institutions proactively promote their unique resources. Providing both inspiration and pragmatic guidance to readers as they undertake their own initiatives, this book discusses the results of a unique survey that provides new and structured information on digital library outreach and instruction, presents outreach case studies illustrating uses of social media, promotion, integration of digital collections into teaching and instruction activities, partnerships with external campus units or community organizations and other activities. Explores many types of instruction from drop-in class sessions and training to course-integrated instruction and ways that digital library practitioners can contribute to the Open Educational Resources (OER) and open pedagogy movements. Details the digital humanities and digital scholarship programs developed at the University of Utah by many of the authors through cross-departmental collaboration. Describes the ways in which the pandemic spurred many institutions to use rapid response, collecting to practice, community engagement and speculates on future directions for outreach and instruction for digital libraries.
