Bicycles in American Highway Planning Bruce D. Epperson, 2014-11-17 The United States differs from other developed nations in the extent to which its national bicycle transportation policy relies on the use of unmodified roadways with cyclists obeying the same traffic regulations as motor vehicles This policy known as vehicular cycling evolved between 1969 when the 10 speed boom saw a sharp increase in adult bicycling and 1991 when the American Association of State Highway and Transportation Officials adopted an official policy that on road bikeways were not desirable This policy resulted from a growing realization by highway engineers and experienced club cyclists that they had parallel interests the cyclists preferred to ride on highways because most bikeways were not designed for high speeds and pack riding and the highway engineers did not want to divert funding from roadways to construct bikeways Using contemporary magazine articles government reports and archival material from industry lobbying groups and national cycling organizations this book tells the story of how America became a nation of bicyclists without bikeways

Bray,1988 **The New Woman and Technologies of Speed in Fin-de- Siècle Literature** Eva Chen,2024-11-01 This is the first literary study on the New Woman s interaction with modern speed culture through use of the typewriter and the bicycle These technologies of speed are among the earliest to be associated with middle class women exposing them to the discipline of mechanized speed while allowing for the construction of a new machine savvy sped up and energized female subjectivity Used for women s office work and daily movement they demand from their women operators a response and adaptation to speed right from the beginning The ability to catch up with imitate adjust to and finally master this mechanized speed is the key to the New Woman s enlarged freedom in the modern city By examining New Woman literature penned by George Gissing H G Wells Grant Allen Geraldine Edith Mitton and Mrs Edward Kennard and stories and comments published in popular magazines this book examines how mechanized speed works on the New Woman typist and cyclist first as discipline and control in typewriting then as commodity and conspicuous display in cycling and finally as rejuvenation stimulation and active thrill Being fast having speed and adjusting to the shocks as well as excitement of techno aided speed is a crucial part of what makes the New Woman new as she stakes a claim to modern speed culture **An Analysis of the Role of Cycling in Sustainable Urban Mobility** Ricardo Marqués,2020-04-30 This book analyses the reasons why cycling is returning to cities around the world as an essential element in solving and overcoming the crisis of the dominant car centric model of urban mobility with its known adverse consequences of congestion pollution and urban space consumption It argues that it is not possible to solve this crisis without giving a central role to the bicycle both as a mode of transport in itself and as an integrating and cohesive element of other forms of transport The bicycle due to its special characteristics of autonomy simplicity and energy efficiency must be a key part of any sustainable urban mobility project It not only returns human scale to the city but is also essential for the effective design of any intermodal system of sustainable metropolitan public transport
