MDPs But building municipal information systems for example in Chile were successful Monitoring and evaluation rarely worked well except when municipalities themselves were convinced of its usefulness such as in Russia Tunisia and Colombia Results in managing service provision were mixed The poverty focus of MDPs was strikingly weak across the portfolio Cost benefit analysis rarely prioritized municipal investments But MDPs helped municipalities strengthen their procurement function MDPs helped municipalities manage services more effectively Better results still can come from a stronger poverty focus more attention to planning and prioritizing investments and more effective operation and maintenance of such investments
