Reading Randomised Controlled Trials Robert Savage, Amy Fox, Anneka Dawson, Helen Gray, Clare Huxley, 2025-03-03 In early 2021/22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children's literacy but a case study in which the methodology of single randomised controlled trials in education can be considered *Reading Randomised Controlled Trials* investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic *Reading Randomised Controlled Trials* is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education *A Guide for Librarians on the Science of Reading* Dr. Daniel A. Sabol, 2025-02-25

Writing the School House Blues Anne Haas Dyson, 2021 Anne Dyson confronts race and racism head on with this ethnographic study of a child's efforts to belong to be a child among children Follow the journey of a small Black child Ta Von as he moves from a culturally inclusive preschool through the early grades in a school located in a majority white neighborhood Readers will see Ta Von encountering obstacles but finding agency and joy through writing and music making especially his love of the blues Most attempts at desegregating schools are studied by reducing individual children to demographic statistics and test scores This book instead provides a child's perspective on challenges to classroom inclusion

Ta Von's journey demonstrates that it is within children's peer worlds formed in response to institutional policies and practices like desegregation initiatives standardized testing and a curricular focus on so called basic literacy skills that inequity becomes part of the experience of childhood This book examines policies about literacy testing and teaching including the potential power of the written word and of the arts Few researchers have had a career so embedded inside the lives of children in a classroom context as Anne Haas Dyson This book should be on every literacy researcher's shelf It is a culmination of years of Dyson's relentless fight against deficit framings of children and the deep inequalities that continue to persist in the world Jennifer Rowsell professor of literacies and social innovation University of Bristol

Literacy on the Left Andrew Lambirth, 2011-04-14 This engaging text explores discourses involved in the teaching of literacy which can be conceptualised as deriving from the political left The concept of a left and a right in politics are fully defined and a unique analytical framework is introduced to examine and categorise perspectives for teaching literacy The book creates a language of critique for methods advocated from liberal left leaning sources within the field of education and connects them to left political agendas that aspire to either reform or revolution to change and improve society These left approaches are then contrasted

with politically right agendas Methods for the teaching of literacy have for many years been seen to be politically motivated by commentators on the left and the right of politics This book considers the ideological sources of educational practice in literacy Methods advocated from more liberal perspective are rarely critiqued and examined for their ideological and political roots **Conference Proceedings - International Reading Association** International Reading Association,1969

Raising Standards in Literacy Greg Brooks,Ros Fisher,Maureen Lewis,2003-09-02 Raising Standards in Literacy represents the best current thinking and research about literacy The book is the outcome of a high profile series of seminars on raising standards in literacy and includes contributions from an impressive group of international researchers and policymakers By offering a rich and unique mix of contemporary perspectives on literacy education this book provides an invaluable source of study and insight into the latest research and developments in the teaching of literacy It includes sections on how research into literacy teaching can inform new approaches found in England the USA and Australia the ways in which literacy education is developing in England the USA and Australia the issues involved in assessing progress in literacy and the validity of research claims made about standards of attainment The book celebrates the apparent success of current literacy initiatives at the same time as raising questions about the feasibility and relevance of such initiatives to the literacy co ordinators and consultants and for all those undertaking further study or research in literacy education
