the psychology and decision making involved for innovating teaching learning socio economic and policy contexts In addition the book shows different ways young people can be creatively involved in reimagining schooling It also details both innovative and radical ideas that currently exist about school transformation such as building learning partnerships for all and creating synergies across formal and informal settings of learning Raising important questions for the future of the relationship between teacher and pupil and positive and pro active behavior There is a growing realization that schools fail to accommodate diverse types of learning and that their purpose is not simply about education Featuring academics and practitioners from many different disciplines this book boldly questions the values that currently permeate school walls and suggests ways that schooling itself can be made better
